

LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Kingsburg Joint Union High School District

CDS Code: 10622570000000

School Year: 2023-24

LEA contact information:

Cindy Schreiner

Executive Director of Student Services

cschreiner@kingsburghigh.com

5598977721

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (foster youth, English learners, and low-income students).

Budget Overview for the 2023-24 School Year

Projected Revenue by Fund Source

This chart shows the total general purpose revenue Kingsburg Joint Union High School District expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Kingsburg Joint Union High School District is \$22,909,074, of which \$17,349,404 is Local Control Funding Formula (LCFF), \$1,711,340 is other state funds, \$986,135 is local funds, and \$2,862,195 is federal funds. Of the \$17,349,404 in LCFF Funds, \$2,822,764 is generated based on the enrollment of high needs students (foster youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.

This chart provides a quick summary of how much Kingsburg Joint Union High School District plans to spend for 2023-24. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Kingsburg Joint Union High School District plans to spend \$24,660,316 for the 2023-24 school year. Of that amount, \$13,425,599 is tied to actions/services in the LCAP and \$11,234,717 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

ESSER III and other federal/state grants, salary/benefits of administration/counselors, office staff, supplies and services are increased due to rising prices of goods and services, and funds to pay general running of the district.

Increased or Improved Services for High Needs Students in the LCAP for the 2023-24 School Year

In 2023-24, Kingsburg Joint Union High School District is projecting it will receive \$2,822,764 based on the enrollment of foster youth, English learner, and low-income students. Kingsburg Joint Union High School District must describe how it intends to increase or improve services for high needs students in the LCAP. Kingsburg Joint Union High School District plans to spend \$2,872,357 towards meeting this requirement, as described in the LCAP.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2022-23

This chart compares what Kingsburg Joint Union High School District budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Kingsburg Joint Union High School District estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2022-23, Kingsburg Joint Union High School District's LCAP budgeted \$2,421,941 for planned actions to increase or improve services for high needs students. Kingsburg Joint Union High School District actually spent \$2,700,289 for actions to increase or improve services for high needs students in 2022-23.

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2023-24]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA.

Kingsburg Joint Union High School District (KJUHSD) has a longstanding tradition of excellence in academics, strong extracurricular programs, a dedicated and caring staff, an outstanding student body and involved parents and community. We value the importance of a holistic educational experience for all students. Students are expected to challenge their minds with the most rigorous academic programs, challenge their bodies with the discipline and team building experience of competitive sports programs, explore vocational and elective areas of study to find their interests and talents, and develop a sense of community service. Our goal is to help students develop personal responsibility and decision-making skills and to prepare and plan for post-secondary education or vocational training.

The district boundaries cover a total of ninety-five square miles, with a population of nearly 18,000 people in portions of Fresno, Tulare and Kings Counties. Except for the city of Kingsburg, the district’s area is predominantly a well producing rural agricultural region. KJUHSD is provided students by four elementary school districts and although not unified, the superintendents work closely together to provide continuity. KJUHSD is student population is 1,232 with 63.5% being Hispanic, 31.0% white, 2.1% Asian, and less than 2% of other ethnicities. Our socioeconomically disadvantaged population makes up 65% of our population, EL population is at 8.3%, and foster youth population is less than 1 percent (specific data presented in the plan will not include foster youth data to protect privacy).

In the last decade, Kingsburg has passed two ten-million-dollar school bonds to help improve the facilities at KJUHSD. A majority of the money of the first bond went to support building and facilities upgrades at Kingsburg High school. The most recent bond focused on technology and providing a student laptop to every student, buying out the solar project, and other upgrades to facilities.

Reflections: Successes

A description of successes and/or progress based on a review of the California School Dashboard (Dashboard) and local data.

In reviewing data from the 2022 California Dashboard, the district is not able to show comparison to previous dashboard results because the 2022 Dashboard is a one year snapshot and the previous Dashboard was a comparison of two years of data. A huge success for the district was the percent of students graduating. The district had a 96.2% (Very high) graduation rate for all students, 96.1% (Very High) for Hispanic students, 96.6% (Very High) for homeless students, 95% (Very High) for SED students, and 97.9% (Very High) for White students. Another area of growth for the district was in the number of students who were reclassified, the district went from 0% for 2 years to 13.9% last year. This school year the school has already reclassified 5 students and based on most recent ELPAC scores has 16 more eligible students for reclassification. The district did see a slight increase on the attendance rate compared to the previous year. When examining sub groups, SED sub group saw increases in SBAC ELA and Math scores, EAP readiness for math, AP passing rate, and dropout rate compared to the previous year. Educational partner feedback through surveys showed teachers and parents saw an increase in school connectedness (parents- 4.4%, teachers- 2.6%). Students reported an increase in agreement of providing resources to help students with personal issues (1.6%). In meetings with educational partners, all agree that the increase in mental health support was needed and appreciate. The district increased from 1 mental health personnel to 3 full time mental health personnel, with an increase to four personnel next year. A request from educational partners from last year was a better examination of data to support student improvement. The district hired a data analyst and the district has been able to better target students who need support, is creating a report that will be sent to students next year on a monthly basis to help students track academic and attendance. The data analyst helped clean up our data and how we report data to educational partners, this change will lead to more consistent and accurate data to support change. In order to build upon our success and take into account educational partner feedback we are going to continue to build upon our LCAP's goals and actions as it relates to ELA, Math and graduation rates. This includes continuing to expand academics supports, increased mental health support, and build upon college and career supports.

Reflections: Identified Need

A description of any areas that need significant improvement based on a review of Dashboard and local data, including any areas of low performance and significant performance gaps among student groups on Dashboard indicators, and any steps taken to address those areas.

In reviewing data from the 2022 California Dashboard, the district demonstrated that suspension continued to be an area of need, plus a new focus on ELA, Math and English Learner Progress. English Learner Progress received a rating of very low on the 2022 Dashboard and the LEA plans on focusing on professional development for teachers in a addition to having an intervention specialist on campus focus on English Learners. In comparing 2020-21 to 2021-22 for suspension is not accurate as 2020-21 was a hybrid year and not all students were on campus at the same time or for the entire school year. With that in mind, the district saw an increase in suspension rate from the baseline year of 2019-20. As students have returned back, the district has seen an increase in drug use and fights. All groups increased in their suspension rate (All= 4.8%, EL= 6.5%, SED= 5.8%). ELA and math saw a decrease in the previous years for both all and EL (All: ELA- 4%, Math= 2%; EL: ELA= 10%, Math= 0%).

The district saw a decrease in AP passing rate and A-G completion rate for all students (AP= 6.1% and A-G= 6.2%). Though the attendance rate increased, chronic absenteeism increased in all groups (All= 3.2%, EL= 3.2%, SED= 1.7%). Due to data entry, the number of students reported for CTE and dual enrollment decreased, but the district feels that this was a one year issue and expects the numbers next year to

reflect a more accurate picture of these areas. In examining educational partner feedback through surveys, an area that all groups showed a decrease was in the district providing a safe environment (Students= 3.7%, Parents= 5.1%, Teachers= 2.9%). Students had a 1% decrease in not feeling connected to school. Educational partner feedback, including surveys identify needs as increase focus on mental health, parent and student engagement to increase school connectedness, increase focus on intervention. Educational partners also stated they understood that the pandemic has lead to different students, with different needs. They asked that the district continue to use their funds to support the needs to students and asked what they can do to support the students, as they stated it is everyone's responsibility to help students get back to and improve from pre-pandemic levels.

To address the identified needs from both dashboard data and educational partner feedback, the district has created or modified actions to support school safety, attendance, and mental health support. To support English language Progress, the LEA plans on focusing on professional development for teachers in a addition to having an intervention specialist on campus focus on English Learners. The modified or new actions are mentioned in the educational partner engagement section and detailed information under the specific actions.

LCAP Highlights

A brief overview of the LCAP, including any key features that should be emphasized.

The LCAP reflects a combination of data prior to the school closure, baseline data from 2019-20 and data from the 2021-22, current 2022-23 local data and educational partner feedback. In analyzing data from 2020-21, 2021-22, and 2022-23 school years, it is difficult to find trends in areas of need. In examining data from 2021-22, the district can see that there is a need to get students reengaged and focused on learning again. Chronic absenteeism increased in all subgroups with overall numbers doubling since 2019-20. Suspension rates increased across all subgroups with a increase in all suspensions of 1.5% compared to 2019-20. In examining all other data, the district did not make progress towards desired outcomes in most areas. The highlight and most important measurement for a high school district is the graduation rate, which as increased. The district had a graduation rate of 97.4% as listed in DataQuest in 2021-22, an increase of 3.9% from 2019-20. Educational partner feedback showed an overall decline in survey results for students, parents/community, and teachers. The main positive across the board was the increase support for students mental health and communication with parents. Throughout educational partner feedback, including surveys the common expressed needs were for more mental health support, academic intervention, and focus on student attendance.

The 2022-23 LCAP addresses the area of needs that the 2022 Dashboard, statewide data and local 2022-23 data indicated, as well as feedback from educational partner feedback. The district has committed a focus approach to meeting student needs in both academic and mental health support. The district will continue to use the additional 15% in supplemental and concentration money the district will add or maintain three new actions to help support student achievement (Goal 1, Action10- Data Accountability) and student health and safety (Goal 2, Action 11- Custodial). The district modified 2 goals to support school safety and attendance. Goal 2, Action 2 (School Safety)- the district is adding a school resource officer to improve safety on campus. Goal 2, Action 8 (Attendance Intervention Specialist)- The district will be adding a part time teacher to support the SARB process and providing a place for students for behavior support instead of suspension. The district did separate Goal 3, Action 2 (Technology) into two separate goals for clarity on money being used for supplemental and concentration compared to LCFF. They will now be Goal 3, Action 2(Technology-Target) and Goal 3, Action 7 (technology).

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

Oasis High School

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

Kingsburg Joint Union High School District is committed to supporting Oasis Continuation High School in their CSI plan, by providing resources that address the issues that have made them a CSI school. The LEA is committed to looking at the needs assessments and resource inequities at the school level to help come up with evidenced based interventions. The CSI Plan is being developed with educational partners in mind and the support of the LEA in making sure the plan is attainable and supports the school to its fullest capacity.

The LEA analyzed why the school site was in CSI with District administration, met with school site administration regularly to help formulate a plan, held staff and school site council meetings to help develop the CSI plan. In conducting the needs assessment, the LEA communicated with educational partners and looked at data from previous school years to help develop the CSI plan. The LEA helped support the school site by making contacts to other Alternative Education sites about what they are doing and how we can use that information in our CSI plan. We communicated via email, phone, and Zoom and looked at evidenced based strategies at other Alternative Education school sites to help develop the CSI plan for our school site. The LEA has engaged its educational partners in the CSI process in the form of parent and student surveys, interviews with various educational partners, and in depth staff meetings around the CSI plan. The feedback from these various educational partners helped inform the LEA where we could improve and address resource inequities within our schools. The LEA and school sites used the Continuous Improvement framework to help develop the CSI plan and come up with ideas and actions as part of the CSI process.

As part of the needs assessment, the LEA looked at Suspension/Expulsion data for the past few years at Oasis Continuation School and why it is "red" on the California Dashboard in past years and why in the "Very high" for the 2022 Dashboard. Also data was looked at from Discipline Referrals, time of day of referrals, and number of referrals by student. The LEA helped support the research of the data from Aeries to identify areas of improvement. We have looked at all interventions that are implemented at the school site and engaged our educational partners in what resources we can provide to improve the suspension/expulsion rate at Oasis. Oasis is a small continuation school site with a small student population that is very mobile. In talking with the CDE, one or two suspensions can make a big difference in the data on the Dashboard for Oasis. The data has helped all educational partners look at providing different student interventions and develop the CSI plan with that in mind.

Resource inequities have been identified through data analysis and include: the need for access to more on site counseling services for our students, access to intervention specialists on school campus, and access to technology while not on school campus to connect with staff and counselors. The LEA helped support the school site in identifying resource inequities by allowing the school site time to collaborate with educational partners during the school day and also researching data for the school site as needed. Resources will be targeted towards mental health counselors that can be on site during the school day and accessible to all students. Resources will also be used to address technology and making sure all students and families have access to the Internet outside of school.

The LEA and school site selected the above mentioned evidenced based interventions after much communication with educational partners and analyzing the needs assessment of the school sites. The LEA helped coordinate and communicate with all educational partners about best practices from other school sites including evidenced-based-interventions that were being utilized. The LEA helps guide and support the school site staff by coordinating meetings, professional development time, and collaboration amongst educational partners to look at evidenced based interventions. This helped provide guidance to educational partners and gain a better understanding of interventions that could help develop and implement the CSI plan.

The LEA and school site listed the needs in order of importance and interventions were selected that would best match our needs at the school site. The LEA along with the school site administration looked at what interventions would be the most impactful from our needs assessment and also communicated with other school districts who have similar needs about what interventions they had implemented. CDE recommendations along with data from the school site and district office helped guide discussions amongst educational partners about what interventions to utilize. Discussions were held around interventions used at other school sites to determine if they would be feasible at our school site. The LEA and school site looked at the resources and capacity of the school site to help determine what evidenced based interventions could be implemented successfully. This helped the school site be realistic about what interventions could be utilized to produce a positive outcome and be sustainable for the foreseeable future.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

The LEA will monitor the implementation and effectiveness of the CSI plan by looking at data that directly impacts student discipline in our CSI school. The LEA will make sure school administration is communicating effectively and consistently with all educational partners to achieve the desired results of the CSI plan. The LEA will look at data on office referrals, cool down visits, and suspension/expulsions to monitor the implementation of the CSI school plan. The LEA will also evaluate the CSI plan by sending out surveys to educational partners as part of the CSI plan evaluation. By looking at this data regularly, it will allow the LEA to have continuous monitoring throughout the school year. The LEA will also monitor the CSI plan by looking at students' grades and credits at various points of the school year to maintain positive progress. Also looking at student behavior and ensuring that it is not a barrier to students earning credits and accessing the curriculum.

The LEA process for evaluating the implementation of the CSI plan will include analyzing the interventions that were implemented and looking at the data to see what trends the new data is compared to previous data. The LEA will analyze previous school year's data including student discipline and student grades and credits and analyze any trends that the LEA sees. We will communicate and review with all educational partners the data that the LEA has gathered to help as part of the evaluation process with the CSI plan and get input on the implementation of the CSI plan.

The LEA's process for monitoring the effectiveness of the interventions to improve student outcomes will include talking to all educational partners including students, staff, parents, and community members on a consistent basis. The LEA will have Zoom meetings to make it easier for our educational partners to be able to communicate with us along with face to face meetings. Also as part of the monitoring process, the LEA will be looking at building capacity amongst staff members through professional development opportunities. These opportunities can help improve student outcomes in regards to student discipline and graduation rates.

The LEA's process for evaluating the effectiveness of the interventions to improve student outcomes will include looking at tools and resources that educational partners can use to rate/score the effectiveness of the interventions that were used. This includes surveys and rating scales that educational partners can fill out to help the LEA evaluate the CSI plan interventions for continuous improvement. Also as part of the evaluation process, the LEA will look at resources that were implemented and evaluate how effective those resources were implemented and utilized.

Engaging Educational Partners

A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP.

Sept. 6, 2022: ELAC/DELAC: Reviewed ESSER 3 funding. LCAP- explained the new look for the California Dashboard and current LCAP data is not available yet for public release.

Sept. 7, 2022- Parent Advisory Committee: Reviewed ESSER 3 funding. LCAP- explained the new look for the California Dashboard and current LCAP data is not available yet for public release. Provide AP passing rate data.

Sept. 12, 2022: Board Meeting: Reviewed that the data will be available later this year due to issues with the state reporting system. ELO and ESSER 3- discussed use of funds

Sept. 12, 2022- KHS School Site Council: Reviewed site safety plan, wellness speaker for students and parents/community

Sept. 26, 2022- Kingsburg Alternative Education School Site Council: Reviewed site safety plan, wellness speaker for students and parents/community, and upcoming WASC visit

October 17, 2022- Board Meeting: Explained the new look for the Dashboard. Reviewed ESSER III- how we have spent money and amendments we are making to the plan.

October 18, 2022- Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP. A parent of a special education student must be a member of the Parent Advisory Committee.

November 14, 2022- Board Meeting: LCAP- Provide data results for SBAC ELA, SBAC Math, CAST, ELPAC, and EL information.

November 16, 2021- Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP.

Dec. 5, 2022- Parent Advisory Committee: Review ESSER III addendum- explained all actions have been supported, just may not have come from ESSER III funding. Discussed adjustments to ESSER (retention bonus, intervention assistant, additional CYS counselor, purchase an additional bus). Parents agreed with the addendum to the ESSER III. Art, Music, and Instructional Materials grant- will focus on supporting the art and music programs with over half of money to these departments, with the rest supporting operation costs, instructional material and collection of texts. Parents appreciated that the main focus of the grant will be supporting music and art. LCAP- data reviewed for: SBAC ELA, SBAC Math, CAST, ELPAC, and CSA. Parents and staff discussed the reasons why they felt there was a decrease in scores, but feel it still could be the effects of the pandemic.

Dec. 6, 2022- ELAC/DELAC: Review ESSER III addendum- explained all actions have been supported, just may not have come from ESSER III funding. Discussed adjustments to ESSER (retention bonus, intervention assistant, additional CYS counselor, purchase an additional bus). Parents agreed with the addendum to the ESSER III. Art, Music, and Instructional Materials grant- will focus on supporting the art and music programs with over half of money to these departments, with the rest supporting operation costs, instructional material and collection of texts. Parents liked the focus on the arts and music. LCAP- data reviewed for: SBAC ELA, SBAC Math, CAST, ELPAC, and CSA. Reviewed EL numbers. Discussion on decrease in scores and ways to encourage EL students to take the ELPAC more seriously so they can be reclassified.

Dec. 12, 2022- Kingsburg Alternative Education School Site Council: WASC visit update

Dec. 12, 2022- KHS School Site Council: ESSER Grant update

Dec. 13, 2022- Board Meeting: Review Art, Music and Instructional Materials Grant. Reviewed the ESSER II Plan Addendum. LCAP- provide California Spanish Assessment data, explained Dashboard should be out this month, surveys to educational partners to be sent in February.

Jan. 17, 2023- Board Meeting: California Dashboard- reviewed current data, including local indicator information.

Jan. 26, 2023- Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP. Reminder again about having a special education parent on your Parent Advisory Committee.

Feb 9, 2023- KHS Student Council: Discussed the LCAP and the importance of getting student input. Students presented ideas they would like to have changed on campus. Many of the items would not fall under the LCAP, but were passed onto the superintendent. Also encouraged them to have their peers take the survey seriously as the district listens.

Feb. 15- March 2, 2023- Teacher Survey: Teacher survey response- 47. Overall concerns from teachers were: continue to fund tutorials, counseling and community hubs, more tutors for struggling students, more instructional aides in classrooms, mentor programs and better communication with the community.

Feb. 15- March 2, 2023- Classified Staff and Administration Survey: Survey response- 24. Overall concerns from staff were: continue to support additional counseling, after school academic support, hire more support staff for students, add a school resource officer, and more training for staff.

Feb.15 - March - Parent/Community Survey: Parent/Community Survey- 86 responses. Overall concerns from parents were: additional electives, more communication through ParentSquare, more engagement in classrooms, different foreign language options, and continued focus on supporting mental health needs of students.

Feb. 16 - 28, 2023- Student Survey: Student survey response- 911. Overall concerns from students were: more elective and AP classes, more academic support, bathrooms, engaged instruction and support from teachers.

Feb. 16, 2023- Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP.

Feb. 21, 2023- Board Meeting: Review Transportation Plan. LCAP- surveys have been given to educational partners, but no results are available yet. Starting to write the 2023-24 LCAP.

Feb. 27, 2023- KHS School Site Council: Reviewed the Home to School Transportation Program.

March 9, 2022- KHS Student Council: Gave an initial update on survey results. Areas of focus for students: More mental health support, better restrooms, after school transportation (was explained it was available, but better communication may need to be improved), summer school options and number of students allowed to attend, and communication of bulletin through different social media.

March 9, 2023- Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP. LCAP's must have actions that support students with disabilities.

March 9, 2023- ELAC/DELAC: Art, Music, and Instructional Materials Grant- on hold on spending as the state has discussed not fully funding the grant, will adjust spending based on the amount the state provides. Transportation plan- reviewed that the state plans on reimbursing 60% of previous years expenses. LCAP: Reviewed survey results- overall students, parents/community, teacher/staff rated the district lower than to the previous year. One positive noted by all groups was the increase in mental health support, but feel more is still needed. The parents stated they could understand why there was a decrease in results, but stated the school is doing what they can to support students. 22-23 Action review- the district was able to meet most of the actions, actions that were not met was due to continued low participation by parents in committee meetings, teachers not traveling for professional development. Discussed potential new actions: school resource officer, additional academic counselor, mental health counselor, and a SARB liaison assistant. Parents stated all of those ideas would benefit students.

March 13, 2023- Parent Advisory Committee: Art, Music, and Instructional Materials Grant- on hold on spending as the state has discussed not fully funding the grant, will adjust spending based on the amount the state provides. Transportation plan- reviewed that the state plans on reimbursing 60% of previous years expenses. LCAP: Reviewed survey results- overall students, parents/community, teacher/staff rated the district lower than to the previous year. One positive noted by all groups was the increase in mental health support, but feel more is still needed. Parents discussed concern over the increase use of drug use on campus. The parents requested that Back to School Night for the high school go back into classrooms and not in the middle of campus. 22-23 Action review- the district was able to meet most of the actions, actions that were not met was due to continued low participation by parents in committee meetings, teachers not traveling for professional development. Discussed potential new actions: school resource officer, additional academic counselor, mental health counselor, and a SARB liaison assistant. Parents stated all of those ideas would benefit students. They appreciate the efforts the district is making to support students.

March 14, 2023- Board Meeting: Discussed survey results and the steps for the LCAP. Discussed the A-G grant.

March 20, 2022: Kingsburg Alternative Education School Site Council: Reviewed Local Wellness Plan, WASC Visit recap, campus facility improvements.

March 20, 2023- All Staff Meeting (classified, administration, teachers): Reviewed Dashboard data and survey results. No comments from the staff members.

March 28, 2023: District Leadership Team (Site Principals and district administration): Provided and discussed educational partner survey results.

March 28, 2023: KHS Student Council: Reviewed student survey results. Council was surprised scores went down, but did explain some questions were confusing. Explained that their request for an additional water bottle filling station will be added by the 50 wing during the updated construction.

April 17, 2023- Board Meeting: Still working on the LCAP, next month new actions being proposed and progress on goals will be reviewed.

April 20, 2023: Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP. LCAP's must have actions that support students with disabilities.

May 8, 2023: Special Education Local Plan Area Operations Meeting: Consultation regarding supports for students with disabilities in the LCAP.

May 15, 2023- All Staff meeting: Presented Draft of 2023-24 LCAP. Reviewed draft LCAP. There was no comments related to the LCAP.

May 15, 2023 District Leadership Team (Site Principals, Counselors and district administration): Reviewed new actions of the 2023-24 LCAP. There was no comments related to the LCAP.

May 15, 2023- KHS School Site Council: Presented Draft of 2023-34 LCAP. Reviewed draft LCAP, local priorities, LCAP federal addendum, and Local Wellness Plan. Council appreciates the focus on vaping and the addition of the School Resource Officer. They approved of the actions, services, and expenditures proposed in the LCAP.

May 15, 2023- Board Meeting: Provided list of modified and new actions for the 2023-24. Discussed when May educational partner meetings were, public comment period and public hearing in June.

May 15, 2023- ELAC/DELAC: Presented Draft of 2023-24 LCAP. Reviewed draft LCAP. Parents appreciated the continued focus on mental health and student safety. They agreed with the new additions to current actions. There were no questions from this educational partner group, however- had there been questions, these would have been presented to the Superintendent who would respond in writing.

May 16, 2023- Parent Advisory Committee: Presented Draft of 2023-24 LCAP. Reviewed draft LCAP. Parents appreciated the continued focus on mental health and student safety. They agreed with the new additions to current actions. There were no questions from this educational partner group, however- had there been questions, these would have been presented to the Superintendent who would respond in writing.

May 17, 2023- Certificated bargaining unit and classified bargaining unit: Presented Draft of 2023-24 LCAP. Reviewed draft LCAP. The bargaining units did not have any comments.

May 22, 2023- Kingsburg Alternative Education School Site Council: Presented Draft of 2023-24 LCAP. Reviewed draft LCAP, local priorities, LCAP federal addendum, and Local Wellness Plan. The council approved the Local Wellness Plan. They approved of the actions, services, and expenditures proposed in the LCAP.

June 1 - 12, 2023- Public Comment Period: Draft 2023-24 LCAP was posted on the district and school websites. No comments were submitted.

June 12, 2023- Board Public Hearing: Presented Draft of 2023-24 LCAP with the budget information. No comments were given.

June 26, 2023- Board Meeting: Local indicators were reported. LCAP and the LEA budget were adopted.

Engagement strategies for input was varied. All meetings were held in person or by Zoom with interpretation available, with some meetings held through both in person and Zoom at the request of committee members. Surveys were sent in both English and Spanish for parents/community members, though since the survey was through Google, parents could translate into any language. Staff meetings were held in person.

A summary of the feedback provided by specific educational partners.

ELAC/DELAC: Parents happy with more students being reclassified, but want a continued focus on improving reclassification rates, encouraging student success and additional mental health supports.

Parent Advisory Committee: Parents wanted a continued focus of the district to be on raising the A-G rates for students, increase the number of dual enrolled classes, increase the AP participation and passing rate, mental health support for students, support for the 9th grade transition, and addressing attendance issues. Committee noted that during the last two years, that students are different from pre-pandemic. Student needs have changed and they understand that supporting students will take longer than anticipated. They appreciate the continued focus on improving students achievement, but realize it may take longer than expected.

School Site Council: The school site council liked the modifications and additions to the LCAP, especially the focus on mental health.

Classified and Teacher Unions: The unions liked the continued focus of the LCAP, they had no additional areas of focus.

Special Education Local Plan Area Operations Meeting: The SELPA discussed providing additional supports for students with disabilities to support learning loss which occurred during the pandemic.

Teachers/Staff: Survey results showed that teachers and staff would like the focus of the district to be: continue to fund tutorials, counseling and community hubs, more tutors for struggling students, more instructional aides in classrooms, mentor programs, more field trip opportunities and reaching out to parents in the community. In evaluating providing a safe environment for students, teachers reported a 2.9% decrease from previous years and an increase in bullying, fights and drugs on campus. Teachers and staff are in support of having a School Resource Officer on Campus.

Students: Students reported through surveys and student council that more more summer school options, more elective and AP classes, more academic support, bathrooms, engaged instruction, better communication with students including the availability of afterschool transportation and support from teachers. Students reported that having access to after school transportation was important to help them be involved in extra curricular activities and help improve student connectedness to school.

Parent/Community Survey: Results showed parents wanted additional electives, different foreign language options, student safety and continued focus on supporting mental health needs of students.

Public Comment Period: No comments were submitted during the public comment period.

Public Hearing: No parent or community member participated in the public hearing.

A description of the aspects of the LCAP that were influenced by specific input from educational partners.

Meetings with educational partners confirmed that our previous goals still should remain the focus of the LCAP. When comparing the 2022-23 to the 2023-24 LCAP the LCAP kept all previous actions with modifications to 6 actions and addition on 1 action. As a result of collaborating with educational partners the following were new or modified actions.

Goal 1, Action 3- Instructional Aides- This action was modified to only include special education instructional aides. All other instructional aides will be reported in Action 11. This will help show the specific support for students with disabilities. School Intervention, with after school transportation- modified from previous LCAP. Action 4 will continue to include lunchtime intervention to support students who after school commitments. Educational partner meetings understand that this is for clarity.

Goal 1, Action 11- Instructional Aides- This action was modified to include instructional aides that are not part of special education. The district will provide additional instructional aides in the classroom to address academic gaps and academic skills. Educational partner feedback was clear that more assistance in the classrooms was needed.

Goal 2, Action 2- School Safety- modified from previous LCAP. Hiring of a school resource officer was added. Educational partner feedback, local and state data demonstrated that school safety was a concern, including the increase in drug use on campus. The addition of school resource officer is felt will support students and teachers feeling safe on campus.

Goal 2, Action 3- Mental Health Services- modified from previous LCAP. Local data and educational partner feedback showed an increase need in mental health services. The district previously hired 1 mental health person, but will increase to 1 and 1/2 mental health people.

Goal 2, Action 8- Attendance Intervention Specialist- modified from previous LCAP. Educational partner feedback, local and state data demonstrated that chronic absenteeism continues to be an issue. The district will have a part time credential teacher to support SARB and other means of suspension.

Goal 3, Action 3- Technology-Targeted- modified from previous LCAP. The modification of this action was for fiscal clarity. Action 3 will focus on target technology with supplemental and concentration funds. Educational partner meetings understand that this is for clarity.

Goal 3, Action 7- New action. This was part of Action 3 in the previous LCAP. This action will focus on LCFF technology. At the Educational partner meetings this change was discussed and they understand that this is for clarity.

Goals and Actions

Goal

Goal #	Description
1	Academic Achievement- KJUHSD believes that all students need to be able to leave our district college and career ready. Improving student academic achievement helps demonstrate that our students are ready when they graduate with a diploma. Measurement of academic achievement will be through SBAC assessment data, graduation rate, A-G completion, AP participation and passing rate, English learner reclassification rate, and educational partner feedback.

An explanation of why the LEA has developed this goal.

The district's mission is to ensure all students leave the district college and career ready. Through educational partner meetings and surveys, focus on academic achievement is essential. The actions will focus on ensuring we have qualified teachers, instructional aides, and support programs to meet the academic needs to ensure all students are college and career ready. When goals were presented to educational partner, academic achievement was rated most important.

Measuring and Reporting Results

Actions

Action #	Title	Description	Total Funds	Contributing
1.1	Properly credentialed teachers.	Properly credential teachers are more prepared to improve academic achievement.	\$7,633,017.00	No
1.2	Credential teachers for English and math supplemental support	As demonstrated in the identified needs and metrics section, CAASPP ELA and math data, identified our low-income students had shown a continued increase in achievement before the pandemic, but after the pandemic low income students have continued to perform lower than the all student group. CAASPP ELA and Math data for low income students is 5% lower in ELA and 8% lower in math than the performance rate for all students. A needs analysis showed that our low income students need specialized direct instruction and support through individualized and small group remediation and acceleration lessons by credentialed teachers. Providing additional, targeted time with skilled professionals will reinforce concepts and provide additional skills practice. In providing specialized support classes, the identified students will engage in individualized lessons that support the closing of their specific learning gaps. We expect the CAASPP rate for the groups listed will increase, as the program is designed to meet the needs most associated with the stresses and experiences of the listed students. However, because the district expects that all students struggling will benefit, this action is provided on an LEA-wide basis. KJUHS D expects an increase in CAASPP score in ELA and in math for the following three years.	\$468,030.00	Yes
1.3	Instructional Aides	Properly trained instruction aides in classrooms to support the academic needs of students with disabilities.	\$97,359.00	No
1.4	School Intervention, with after school transportation	As demonstrated in the metrics section and educational partner feedback a need that has been exacerbated by the pandemic especially for English learners, low income, and foster students, including those who qualify for special education services and who are homeless, is for more after school intervention and support to help the identified students meet both local and four year college	\$130,784.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>graduation requirements. Graduation data for overall is 97.4% with low income being 95%, English learners 91.7%, Homeless 96.4% and special education 86.4%. A needs analysis shows that the identified students need more focused intervention and support. The district will provide lunchtime intervention, after school intervention, and Saturday School with credentialed teachers in core academic areas to address the identified needs of each student. The district will also provide additional transportation routes so that the identified students can attend the after-school interventions. In these additional intervention sessions, teachers will work with the identified students to develop the academic and organizational skills needed to meet the academic expectations of the classes. We expect the graduation rate for the groups listed will increase, as the program is designed to meet the needs most associated with the stresses and experiences of the listed students. However, because the district expect that all students struggling will benefit, this action is provided on an LEA-wide basis. KJUHSD expects that our graduation rates for the listed groups will be increase for the following three years or until they meet the same rate of all students.</p>		
1.5	Summer School with Transportation	<p>As demonstrated in the metrics section, graduation data and college and career indicator (prior to the pandemic) show that, English learners, low income, and foster students, especially those who qualify for special education services and who are homeless students have a lower rate than other students within the district. Currently, graduation data for overall is 97.4% with low income being 95%, English learners 91.7%, Homeless 96.4% and special education 86.4% A local needs assessment shows that the identified student groups need extended learning opportunities to learn skills and concepts and deepen understandings. In an effort to better support the identified groups, the district will provide summer school classes, including transportation, for tutorial support for both remediation and acceleration. Providing summer school, including transportation, for the identified students will provide more educational opportunities and additional time for students to master the academic content through the practice of</p>	\$238,467.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>missing skills and concepts. By providing these services the district anticipates the graduation rate and college and career indicator to increase each year as the program is designed to meet the needs most associated with the these student groups. However, because the district expects that all students struggling will benefit, this action is provided on an LEA-wide basis.</p>		
1.6	Alignment of instruction with content standards	Alignment of instruction with content standards by utilizing outside services, purchasing textbooks, books, materials, resources and technology.	\$78,792.00	No
1.7	Library Media Services	<p>As demonstrated in CAASPP ELA assessment scores, data reflected that our low-income students are showing slight increases in ELA assessments, but still there is still a gap between all students. CAASPP ELA data for low-income students is 55%, 5% lower than the performance rate for all students. A local needs assessment shows that low-income students need additional access and opportunities to improve reading comprehension skills by providing greater access to content as it is necessary to develop reading comprehension and critical thinking. Student survey results also indicated that students want more academic support. In an effort to better support our low-income students with reading comprehension, the district will provide a program that provides audio reading of textbooks, novels, and pleasure reading. The library media service teacher will assign books to students, in addition to providing supplemental reading material at the students level and interest. In providing additional library media services, students will engage in the text and novels in the classroom, in addition to pleasure reading as students can focus on comprehending the material and not just being able to read the material. The district expects that the CAASPP ELA scores for low-income students will increase significantly, as the program is design to meet the needs most associated with the experiences of low-income students. However, because we expect that all students showing CAASPP scores of standard nearly met or standard not met will</p>	\$126,486.00	Yes

Action #	Title	Description	Total Funds	Contributing
		benefit, this action provided on an district wide basis. The district expects that our CAASPP scores for our low-income student will increase for the following three years.		
1.8	Intervention Class	As demonstrated by the metrics and educational partner feedback, state assessment data in the areas of ELA and Math, and graduation data, a need that has been exacerbated by the pandemic especially for English learners, low income, and foster students, including those who are homeless students at all grade levels is for more targeted intervention during the school day in order to help students meet graduation requirements. Graduation data for overall is 97.4% with low income being 95%, English learners 91.7%, and Homeless 96.4%. A local needs assessment revealed that the identified students often have time constraints outside of school hours, so it is important to offer additional intervention during the learning day. To address this need, the district will provide intervention classes during the school day to address academic gaps, credit recovery, and academic skills. Intervention classes will provide targeted academic supports delivered through evidence-based instructional strategies in an effort to strengthen basic academic skills. We expect the graduation rate for the identified groups listed will increase, as the program is designed to meet the needs most associated with the stresses and experiences of the listed students. However, because the district expect that all students struggling will benefit, this action is provided on an LEA-wide basis. KJUHSD expects that our graduation rates for the listed groups will be increased until they meet the same rate of all students.	\$217,914.00	Yes
1.9	English Language Development Program	As demonstrated in the metrics sections and educational feedback section, ELPAC data and reclassification rate, English learners are struggling to be reclassified. Reclassification rate was 13.9% with 9 students meeting the performance level of 4 being eligible to to reclassified. To address this need, the district will have a designated ELD class for newcomers, designated ELD instruction in English class, instructional aide support in classrooms, supplemental material	\$44,001.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>to support English language development, and a new software program to better monitor the progress of English language learners and provide teachers with specific lessons to support the students. Targeted ELD supports provided during the day will give students additional time to practice language fluency and to strengthen academic vocabulary. Teachers will utilize supplemental software to frequently monitor student progress in an effort to make timely instructional decisions for learning. Instructional aides will be able to provide small-group and individual instruction for students, and assist the teacher in implementing high-quality instruction. Supplemental materials will include, visual aids, manipulatives, and other materials designed to accelerate the learning of English Learners. We anticipate these supports will increase the number of students being eligible to be reclassified and the number of students being reclassified.</p>		
1.10	Data Accountability	<p>As demonstrated in the identified needs and metrics section, graduation data, A-G completion rate and input from educational partners identified that our English learners, low income, and foster students, especially those who qualify for special education services and who are homeless students perform lower than the performance rate of all students. An analysis of local needs revealed that the academic needs of these students are most efficiently addressed when teachers have up-to-date disaggregated information so that they can quickly identify the resources needed to tailor instruction to be able to close specific achievement gaps. Further, teachers report not having sufficient time and expertise to be able to collect and disaggregate data from various platforms related to the academic and social-emotional wellness of their students on a frequent basis. To address this need, the district will promote monitoring student achievement and instructional practices through the support of the Data and Accountability Team, including hiring a staff member to work at the local sites to gather, disaggregate, and provide data, specific to the identified student groups, to site teachers and departments for analysis and collaboration. The staff member will provide teachers data after formative assessments, grading windows and statewide</p>	\$122,146.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>data release and then collaborate with teachers on if additional or different data is needed. Staff will be provided monthly reports on suspension and attendance to analyze and then provide teachers timely academic and behavioral wellness information about the identified students in their classes, keeping them focused on the identified gaps of English Learners, Low-Income students and Foster Youth. Equipped with this information, teachers will be empowered to make informed decisions about specific instructional strategies and lesson design that will positively impact the identified student groups. They will also be able to analyze and track trends both in the short term and over time which will help them to make decisions leading to improving the outcomes for the identified students. We expect that graduation data and A-G completion rates for the identified groups will increase significantly, as teachers will be able to dive deeper into the data to see specific areas that the identified students are struggling in and provide appropriate support. However, because the district expects that all students showing lower graduation and A-G completion rates will benefit, this action is provided on an district-wide basis. KJUHSD expects that our graduation rates for the listed groups will be increased until they meet the same rate of all students and A-G rates to increase for the next three years.</p>		
1.11	Instructional Aides	<p>As demonstrated by the metrics and educational feedback, state assessment data in the areas of ELA and Math, and graduation data, a need that has been exacerbated by the pandemic especially for English learners, low income, and foster students, including those who are homeless students at all grade levels is for more targeted intervention during the school day in order to close academic performance and help students meet graduation requirements. Graduation data for overall is 97.4% with low income being 95%, English learners 91.7%, and Homeless 96.4%. A local needs assessment revealed that additional support in the classroom to provide more individualized instruction is important to providing additional academic skills to the identified students. To address this need, the district will provide instructional aides in the classroom to address achievement gaps by providing individualized and small</p>	\$187,102.00	Yes

Action #	Title	Description	Total Funds	Contributing
		group support within the classroom, targeting the identified students who lack the academic skills needed to succeed. We expect the graduation rate for the identified groups listed will increase, as the program is designed to meet the needs most associated with the stresses and experiences of the listed students. However, because the district expects that all students struggling will benefit, this action is provided on an LEA-wide basis. KJUHSD expects that our graduation rates for the listed groups will be increase until they meet the same rate of all students.		

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The LEA used the following rating scale to determine the effectiveness of the implementation of the actions as planned. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal One helped make progress towards the LEA's goal: KJUHSD believes that all students need to be able to leave our district college and career ready. Improving student academic achievement helps demonstrate that our students are ready when they graduate with a diploma.

Action 1: Properly credentialed teachers

Implementation Status: 3- Effective. The LEA has clear policies and procedures for core and supplemental curriculum adoptions. The LEA hires and retains highly qualified teachers. This year there was 1 teacher who was missassigned but that was due to a late resignation and the teacher just starting her credential program. No substantive difference in planned action compared to the actual implementation.

Action 2: Credential teachers for English and math supplemental support

Implementation Status: 3- Effective. The LEA provided the supplemental support classes for English and math. No substantive difference in planned action compared to the actual implementation.

Action 3: Instructional Aides

Implementation Status: 2- Somewhat Effective. The LEA struggled to keep instructional aides throughout the year. As aides left, the district hired replacements. Students were supported throughout the year, just not by the same aides. The LEA ended up having more instructional aides than the previous year. No substantive difference in planned action compared to the actual implementation.

Action 4: School Intervention, with after school transportation

Implementation Status: 3- Effective. The district provided lunch time math tutorials 5 days a week, after school tutoring 4 days a week, access to 24/7 online tutoring, and targeted 1:1 online tutoring. Students were offered transportation, but very few of any took advantage of the after school transportation. No substantive difference in planned action compared to the actual implementation.

Action 5: Summer School with Transportation

Implementation Status: 3- Effective. Last year summer school was once again offered online and not in person do to health considerations. More students took summer school than has occurred over the last 10 years. Transportation was not needed, as students could complete at home. No substantive difference in planned action compared to the actual implementation.

Action 6: Alignment of instruction with content standards

Implementation Status: 3- Effective. The district purchased textbooks, materials and resources to support students, in addition to replacing textbooks and material that was lost during the pandemic. No substantive difference in planned action compared to the actual implementation.

Action 7: Library Media Services

Implementation Status: 3- Effective. The library media service teacher provided support to students by providing audio textbooks, library reading books at students levels and interest, and with lesson to English classes to support their progress in English. No substantive difference in planned action compared to the actual implementation.

Action 8: Intervention Class

Implementation Status: 3- Effective. The LEA provided intervention classes to support students. Students were able to learn strategies to improve academic skills and the opportunities to earn back credit. No substantive difference in planned action compared to the actual implementation.

Action 9: English Language Development Program

Implementation Status: 3- Effective. The LEA provided a new online program that provided teachers with professional development in short lessons. This online program will also list each of the EL students, their levels and provide specific targeted lessons to support the students. No substantive difference in planned action compared to the actual implementation.

Action 10: Data Accountability

Implementation Status: 3- Effective. The data accountability analyst provided staff throughout the year data to review and target students who were struggling academically. No substantive difference in planned action compared to the actual implementation.

Action11: Instructional Aides

Implementation Status: 2- Somewhat Effective. The LEA struggled to keep instructional aides throughout the year. As aides left, the district hired replacements. Students were supported throughout the year, just not by the same aides. The LEA ended up having more instructional aides than the previous year. No substantive difference in planned action compared to the actual implementation.

Overall Successes: Kingsburg JUHSD was able to implement supports for students: intervention classes, lunch tutorial, after school tutorial, online tutoring, supplemental courses, and instructional aide support. The LEA worked with educational partners to develop these actions to support students.

Overall Challenges: Kingsburg JUHSD struggled to keep instructional aides during the year. The district has adjusted starting salary, but this has not helped with keeping instructional aides. Many of the aides are working on becoming teachers and lose them as they start their intern or student teaching programs. Another challenge the district faces is having the additional supports and students not taking advantage of them. Online 24/7 tutoring was available to students, but only a few used. Those who were offered 1:1 online tutoring did not take advantage even after parent agreement. The district will need to continue to find ways to encourage students to take advantage of the additional supports made available to them.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 3: Instructional Aides- Did not meet expenditures. Instructional aide staff had a high turnover rate and hiring replacements was difficult and took time. By the end of the year, all positions were filled, but just not during the entire year.

Action 4: School Intervention, with after school transportation- Expenditures were exceeded. The district offered more after school and Saturday interventions than originally planned.

An explanation of how effective the specific actions were in making progress toward the goal.

The LEA used the following rating scale to determine the effectiveness of the actions to achieve the articulated goal. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal One helped make progress towards the LEA's goal: KJUHSD believes that all students need to be able to leave our district college and career ready. Improving student academic achievement helps demonstrate that our students are ready when they graduate with a diploma.

Actions:

Action 1: Properly credentialed teachers, Action 2: Credential teachers for English and math supplemental support, Action 3: Instructional Aides, Action 6: Alignment of instruction with content standards, Action 7: Library Media Services, Action 10: Data Accountability, Action 11: Instructional Aides

Effectiveness of Actions: 2- Somewhat Effective

Metrics: SBAC ELA and Math, High School Graduation Rate

Kingsburg JUHSD saw specific academic measurements decrease in comparison to the baseline year, but the metric of students graduating increased significantly a from the baseline year and 2 of the 3 targeted groups have met the graduation rate desired outcome for 2023-24.

* SBAC scores:

- * SED- ELA, 2% increase in met or above
- * SED- Math, 1% increase in met or above
- * All/SED- Math College ready, All .3% and SED 1.4% increase in college ready.
- * All- ELA, 4% decrease in met or above; Math- 2% decrease in met or above.
- * EL- ELA- 10% decrease in met or above; Math- remained the same
- * High School Graduation Rate:
- * All- 6.3% increase
- * EL- 1.7% increase
- * SED- 6.8% increase

Action 4: School Intervention, with after school transportation, Action 5: Summer School with Transportation, Action 8: Intervention Class

Effectiveness of Actions: 2- Somewhat Effective

Metrics: All metrics listed in Goal 1.

Kingsburg JUHSD saw overall decreases on most metrics in goal 1. SED made the most improvements with a 29.1% improvement on AP passing rate, 6.8% increase in graduation, and remaining the same for A-G completion rate when the All students and EL students saw a decrease.

Action 9: English Language Development Program

Effectiveness of Actions: 2- Somewhat Effective

Metrics: EL Student making progress toward English Proficiency, EL Reclassification Rate

Kingsburg JUHSD saw the number of students who were reclassified increase, but the number of students showing progress decreased from the baseline year.

- * Progress toward English Proficiency
- * 2% decrease from baseline year.
- * 3% decrease in the number of students scoring Level 4 or 3.
- * Reclassification Rate
- * 13.9% increase. The district reclassified students for the first time since 2019-20.

Analysis Statement: The continued focus on supporting students did not show improvement across the board, but in one of the most important metrics, high school graduation rate, the district saw a significant increase. Educational partners also have stated that they understand that metrics related to others measurements such as assessment have declined, but appreciate that high school graduation rate has increased. The actions were rated as somewhat effective as the metric results did not improve in all metrics. The actions related to supporting SED students (Action 2, 4, 5, 7,8, 9,10, 11) demonstrated effectiveness as SED showed the most growth from the previous year. We believe that the additional targeted intervention provided by teachers helped SED students make slight increases; however not all students took advantage of transportation provided for out of school intervention. The targeted focus on English Learners did not show an increase in proficient scores, but the district was able to reclassify 13.9% of their students which as an increase from the two previous years.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Metrics section was updated to reflect current data and adjusted desired outcomes to reflect the impacts the pandemic had on education. When original desired outcomes were created, the goal was to reach and exceed pre-pandemic levels. The LEA is understanding the impact the pandemic has had on students and are adjusting the metrics to a level that is more achievable.

- * Smarter Balanced ELA points from standard: 50 points above standard
- * Smarter Balanced Math points from standard: 30 points below standard
- * Smarter Balanced ELA met or above: All- 65%, EL-10%, SED-58%
- * Smarter Balanced ELA met or above: All- 29%, EL-13%, SED-21%
- * A-G Completion: All- 44%, EL-17%, SED-31%
- * EAP ELA College Ready: All- 31%, EL- 4%, SED- 21%
- * EAP Math College Ready: All- 15%, EL- 4%, SED- 8%
- * High School Graduation Rate: SED- 95%
- * AP Passage Rate: All- 50%, SED- 50%
- * EL students making progress towards English Proficiency: 35%
- * A-G Completion and CTE Pathway Completion Rate: All- 12%, EL- 4%, SED- 7%

Actions:

Action 3 was revised to reflect just instructional aides that support special education students.

Action 11 was revised to reflect instructional aides who support low income and English Learners.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
2	Maintain a positive and safe environment- KJUHSD believes that a positive and safe environment is paramount in providing an environment that promotes learning, high academic achievement and students who will become good citizens. Measurement of a positive and safe environment will be through attendance rate, chronic absenteeism rate, suspension rate, expulsion rate, educational partner feedback.

An explanation of why the LEA has developed this goal.

The district has made safety a priority, as students feeling safe and positive promotes learning. Students reported that additional services to make them feel safe were important, especially in areas of mental health support. The actions in the goal are focused on promoting a positive and safe environment that will be measured by statewide data and educational partner feedback. Educational partner feedback rated safety just a little less than academic achievement.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24

Actions

Action #	Title	Description	Total Funds	Contributing
2.1	Behavior Supports	Current data shows an increase in suspension since the baseline year. Comparing data from 2020-21 and 2021-22 is not accurate as 2020-21 was a hybrid year where students were not on campus for the full year. Suspension data for 2021-22 was 4.8% for all students, 6.5% for EL students, and 5.8% for SED students. Educational partner survey showed students felt 3.75% less safe than in previous year. An analysis of the causes for increased suspension rates showed that the identified groups could benefit from developing intra and inter-personal skills like self-regulation which is a necessary behavioral life skill. Equipping staff with de-escalation strategies and other behavioral supports is essential in creating a safe and positive climate. To address this need, the district will incorporate evidence based curriculum for students, professional development for staff on	\$150,222.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>behavioral supports, and additional administrative focus to provide individual support for positive behavior. In providing this additional support, students will learn to recognize reasons for behavior issues and how to cope with those reasons. The district expect that suspension rates will decrease for the identified students, as the program is designed to meet the needs most associated with the stresses and experiences of low income and homeless. However, because we expect that all students need the skills to develop self-regulation skills, this action is provided on a district-wide basis. KJUHSD expects that our suspension data will decrease for the following three years or until below 3% and see an increase in students feeling safe for the following three years.</p>		
2.2	School safety	<p>Provide a safe environment for students through the use and upgrade of security cameras, school safety dog, visitor check-in system, online system to monitor student mental health, emergency alert system, and police at school/sporting functions. The district will hire a full time school resource officer.</p>	\$191,375.00	No
2.3	Mental Health Services	<p>As demonstrated in the identified needs and metrics section, student survey data, local data, and input from educational partners identified a need for an increase in mental health services. Student survey data shows a decrease in 1% in school connectedness, but a 1.6% increase in resources to support personal issues. Low income, homeless, and foster students have seen a higher request of mental health services as compared to all students, but often have the least amount of access to mental health services. A local analysis of data of students requesting mental health support showed identified students could benefit from district having a mental health counselor to work with students who are in need of mental health support, provide an outside company to connect families with outside therapists and work with the county for additional All 4 Youth providers. The mental health counselors and increased All 4 Youth services will provide identified students with social-emotional and wellness support</p>	\$172,500.00	Yes

Action #	Title	Description	Total Funds	Contributing
		throughout the school day. Connecting families to outside therapists will enable parents and guardians to obtain specialized or continued mental health support when warranted. The district expects that student survey data on school connectedness and supports will increase, as the supports are designed to meet the needs most associated with the stresses and experiences of the identified groups. However, because we know that all students are experiencing an increased need in mental health services, this action will be provided on an district-wide basis. KJUHSD expects that student survey data on school connectedness and supports will increase for the following three years.		
2.4	Outside Agency Services	Provide services to students through outside agencies that include: School Psychologist, Nurse for vision/hearing assessments, Speech Pathologist, and Athletic Trainer.	\$112,009.00	No
2.5	School Transportation	Provide transportation to students who do not live in the city limit boundaries.	\$213,357.00	No
2.6	Maintenance and Facilities	Includes salaries/benefits for personnel and materials and supplies to maintain facilities.	\$1,397,946.00	No
2.7	9th grade mentor program	Student survey data, and input from educational partners identified a need to increase the English learners and low income populations' engagement to school to increase the graduation rate. Graduation data for low income is 95% and English learners 91.7%. Student survey data shows a decrease in 1% in school connectedness. Educational partner feedback reflects that low-income and English learner students who struggle during their freshman year are more likely to not graduate from the comprehensive high school. A local analysis of data of students showed that the identified students would benefit from a positive transition from middle school to high school	\$31,484.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>The district will continue the freshman mentor program at the comprehensive high school to support the transition to high school and get the identified students connected with student mentors. In providing a strong foundation of support, identified students will be more engaged in school by having activities to participate in and a mentor student they can go to for support. We expect higher graduation rates and higher levels of school connectedness as the program is designed to meet the needs most associate with the stresses and experiences of the identified students. However, because we expect that all students who do not engage in school will benefit, this action is provided on a school-wide basis. KJUHSD expects that school connectedness and graduation rate will increase for the following three years.</p>		
2.8	Attendance Intervention Specialist	<p>As demonstrated in the metrics sections, chronic absenteeism data identifies that low-income and English Learners, have a higher chronic absenteeism rate than all students and it has been exacerbated by the pandemic. Chronic absenteeism rate for low-income students is 23.4%, 4.7% higher and English learners 24.5%, 5.8% higher than all students. Educational partner feedback revealed that low-income, foster, and English learners do not feel as connected to school. This is supported by student survey results, which showed that students feel less connected to school this year compared to last year. To address this need, better understand the root cause of the listed students' attendance issues, the district will hire a full time attendance intervention specialist. In providing the intervention specialist and a support person, they will be able to complete home visits and implement the SARB program aimed to address the root causes and provide support to the various barriers that get in the way of continuous attendance for the listed students. We expect that the chronic absenteeism rate will decline significantly, as the support people are designed to meet the needs most associated with the stresses and experiences of low-income and English Learners. However, because we expect that all students high high chronic absenteeism will benefit, this action is provided on an district-wide</p>	\$279,420.00	Yes

Action #	Title	Description	Total Funds	Contributing
		basis. KJUHSD expects that our chronic absenteeism rate for the identified students will decrease for the following three years.		
2.9	School Safety Monitor	Current data shows an increase in suspension since the baseline year. Comparing data from 2020-21 and 2021-22 is not accurate as 2020-21 was a hybrid year where students were not on campus for the full year. Suspension data for 2021-22 was 4.8% for all students, 6.5% for EL students, and 5.8% for SED students. Educational partner survey showed students felt 1% less safe than in previous year. Educational partner feedback has identified a need to maintain a safe learning environment that is focused on academic achievement, maintaining high standards, fostering positive relationships between staff and students, and encouraging parental and community involvement. To address this need, the district will hire a full time safety monitor. A full time safety monitor will allow students to have the same consistent presence on campus and encourage students to report potential issues that will help lower suspension rates and increase the rate students feel safe on campus. The safety monitor will provide daily positive interactions, help to implement clear behavioral expectations, and help to reduce physical conflicts by promoting the use of conflict resolution skills. The district expects that identified students suspension rate will decrease and student survey results on feeling safe will increase, as the program is designed to meet the needs most associated with the stresses and experiences of low income students. However, because we expect that all students need the sense of safety, this action is provided on a district-wide basis. KJUHSD expects that our suspension data will decrease for the following three years or until below 3% and see an increase in students feeling safe for the following three years.	\$76,588.00	Yes
2.10	After School Transportation, Athletics	Educational partner feedback revealed that low-income, foster, and English learners do not feel as connected to school. This is supported by student survey results, which showed that students feel less connected to school this year compared to last year. In an effort to	\$70,732.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>create more positive connections to school, the district continues to provide various athletic programs, but student feedback showed that low income and foster students do not always have reliable after school transportation creating a barrier to participating in sports. To address this need, the district will provide transportation for after school school athletics to improve student connectivity, physical and mental development, self-discipline, and access to opportunity through school sports. We expect that school connectedness for the identified students will increase, as this program is design to meet the needs most associate with the stresses and experiences of the above groups. However, because we expect all students to benefit, this action is provided on a district-wide basis. KJUHS D expects that our the listed groups connectedness will increase for the following three years.</p>		
2.11	Custodial Staff	<p>As outlined in the action above, student feedback showed that low income and foster students do not always have reliable after school transportation creating a barrier to participating in afterschool programs and impacting student’s sense of connectedness to school. Additionally, educational partner survey data showed mixed results in meeting the health and safety needs, with students and parents showing a decrease (students -6.5%, parents -.7%), and teachers and staff showing an increase (teachers 6.8% and staff 8.4%). Student survey data showed a decrease of 6.3% in agreeing/strongly agreeing to classrooms, bathrooms and office spaces are clean and orderly. The district believes that increasing custodial staff time would help to address these concerns. In order to maintain transportation to afterschool programs for low income and foster students and to address the needs related to health and safety, the district will hire an additional custodial staff member to support the health and safety of campus through increased sanitation and cleaning. This will allow the current staff to maintain the bus routes to support low income and foster youth while increasing the ratio of direct services provided between staff and students. The district expects that student survey results related to health and safety and school connectedness to increase, as the supports are designed to meet the needs most</p>	\$88,720.00	Yes

Action #	Title	Description	Total Funds	Contributing
		associated with the stresses and experiences of the identified groups. However, because we know that all students will benefit from clean, safe and healthy campus, this action is provided on an district-wide basis. KJUHSD expects that student survey data data on health and safety and classrooms, bathrooms and office spaces are clean and orderly will increase over the following three years.		

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The LEA used the following rating scale to determine the effectiveness of the implementation of the actions as planned. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Two helped make progress towards the LEA's goal: KJUHSD believes that a positive and safe environment is paramount in providing an environment that promotes learning, high academic achievement and students who will become good citizens.

Action 1: Behavior Supports

Implementation Status: 3- Effective. The LEA has focused on supporting and encouraging students for positive behavior. They have implemented recognition programs, increased alternatives to suspension, and a software program that has students review their behavior and provide ways to improve. No substantive difference in planned action compared to the actual implementation.

Action 2: School safety

Implementation Status: 3- Effective. The school has multiple cameras on campus, had the safety dog on campus throughout the year and expanded the online monitoring system to identify student safety issues. No substantive difference in planned action compared to the actual implementation.

Action 3: Mental Health Services

Implementation Status: 3- Effective The LEA provided mental health services for students. In addition to the money spent from this action, the district used one time funding to have 3 full time mental health counselors on campus. No substantive difference in planned action compared to the actual implementation.

Action 4: Outside Agency Services

Implementation Status: 3- Effective. All outside services were provided. For the 2022-23 school year the services of an adaptive physical fitness teacher was not needed as there were no students needing that service. No substantive difference in planned action compared to the actual implementation.

Action 5: School Transportation

Implementation Status: 3- Effective. Transportation was provided to students who did not live in the city limits. No substantive difference in planned action compared to the actual implementation.

Action 6: Maintenance and Facilities

Implementation Status: 3- Effective. All facilities were maintained as planned. No substantive difference in planned action compared to the actual implementation.

Action 7: 9th grade mentor program

Implementation Status: 3- Effective. The 9th grade program was implemented. 9th grade students had multiple opportunities and activities to meet with their mentors during the year. No substantive difference in planned action compared to the actual implementation.

Action 8: Attendance Intervention Specialist

Implementation Status: 3- Effective. The LEA completed numerous home visits, SARB meetings also increased to address reasons why students were not attending. The SARB intervention specialist would go to students homes and pick them up and bring them to school. No substantive difference in planned action compared to the actual implementation.

Action 9: School Safety Monitor

Implementation Status: 3- Effective. Safety monitor and new pass system helped the number of students out on campus during class decrease. No substantive difference in planned action compared to the actual implementation.

Action 10: After School Transportation, Athletics

Implementation Status: 3- Somewhat Effective. Transportation was available, but few students took advantage of the transportation. No substantive difference in planned action compared to the actual implementation.

Action 11: Custodial Staff

Implementation Status: 3- Effective. The additional custodial staff after school allowed for rooms to be cleaned nightly and free up an additional staff member to take home students. No substantive difference in planned action compared to the actual implementation.

Overall Successes: Kingsburg JUHSD was able to implement the actions from the goal. A major success for the district was providing more mental health support for students, to include 3 full time mental health professionals. Students reported higher agreement in support for help with personal issues compared to the previous year. Another success was the school drop out rate was lower than the previous year. Parents and teachers felt students were more connected than the previous year, though the students did not agree.

Overall Challenges: Kingsburg JUHSD struggled with students attending school. The overall attendance improved from the previous year, but still did not meet the baseline year. Chronic absenteeism still continues to be a challenge as this continued to increase. The addition of an attendance intervention specialist for the 22-23 shows initially that student attendance was better, but the district will have to wait for final numbers to be released.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 5 : School Transportation- Did not meet expenditures. The district was short personnel for part of the school year, which accounted for the decrease in funds spent. Transportation for all students was not impacted though,

An explanation of how effective the specific actions were in making progress toward the goal.

The LEA used the following rating scale to determine the effectiveness of the actions to achieve the articulated goal. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Two helped make progress towards the LEA's goal: KJUHSD believes that a positive and safe environment is paramount in providing an environment that promotes learning, high academic achievement and students who will become good citizens.

Actions:

Action 1: Behavior Supports, Action 2: School Safety, Action 7- 9th Grade Mentor Program; Action 9- School Safety Monitor

Effectiveness of Actions: 2- Somewhat Effective

Metrics: High School Dropout Rate, Suspension Rate, Expulsion rate, Provide a safe environment

Kingsburg JUHSD saw suspension and expulsion rates increase from both the baseline year and previous year. Dropout rate decreased for all students and SED, but increased for EL. All groups (students, parents, teachers) reported a decrease in agreeing that the LEA provides a safe environment

* High School Dropout Rate

* All- 1.1% decrease

* EL- 4.3% increase

* SED- 1.6% decrease

* Suspension

* All- 4.2% increase

* EL- 6.5% increase

* SED- 5.4% increase

* Expulsion

- * All- .4% increase
- * EL- .9% increase
- * SED- .6% increase
- * Safe Environment
- * Students- 3.7% decrease
- * Parents- 5.1% decrease
- * Teachers- 2.9% decrease

Action 3: Mental Health Services, Action 4: Outside Services; Action 8- Attendance Intervention Specialist;

Effectiveness of Actions: 2- Somewhat Effective

Metrics: Attendance Rate, Chronic Absenteeism, School connectedness, provide resources to help with personal issues.

Kingsburg JUHSD saw overall attendance rate increase from previous year (92.95% to 93.3%), but chronic absenteeism rates doubled for all students since the baseline year of 2019-20. Students reported a decrease in school connectedness, but teachers and parents report an increase. Students did report an increase in support for personal issues.

- * Chronic Absenteeism
- * All- 3.2% higher from previous year
- * EL- 3.2% higher from previous year
- * SED- 1.7% higher from previous year
- * School Connectedness
- * Students- 1% decrease
- * Parents- 4.4% increase
- * Teachers- 2.6% increase
- * Provide Resources for personal issues
- * Students- 1.6% increase

Action 5: School Transportation; Action 6- Maintenance and Facilities, Action 10: After School Transportation, Athletics; Action 11: Custodial Staff

Effectiveness of Actions: 3- Effective

Metrics: Facilities, School Connectedness,

- * Facilities
- * maintained in good report.
- * School Connectedness
- * Students- 1% decrease
- * Parents- 4.4% increase
- * Teachers- 2.6% increase

Kingsburg JUHSD yearly facility report stated all met good repair. Students do report that bathrooms need to be improved, but overall the campus is clean and maintained.

Analysis Statement: Metric data comparisons for suspension and expulsion is difficult as data is comparing a hybrid school year to a full in person year. When comparing suspension and expulsion data to the baseline year, there was still an increase. The LEA is struggling with an increase use of drugs on campus, leading to more suspensions. Chronic absenteeism continues to be a struggle the the district as families are still adjusting from the pandemic. Parents are more careful and keeping their students home more when sick, some families also got adjusted to online schooling and being able to complete from anywhere and are not taking vacations more frequently during the school year. The addition of the attendance intervention specialist has helped the district to follow up with families regarding student attendance, but this remains a battle to get students coming to school daily. The increase in mental health personnel increased students feeling more resources were available to provide resources for personal issues. Having three contracted mental health therapists has been instrumental in getting our students the mental health support they need, but unfortunately, it still is not enough to meet the needs of all of our students.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Metrics section was updated to reflect current data and adjusted desired outcomes to reflect the impacts the pandemic had on education. When original desired outcomes were created, the goal was to reach and exceed pre-pandemic levels. The LEA is understanding the impact the pandemic has had on students and are adjusting the metrics to a level that is more achievable.

- * Attendance Rate: 95%
- * Chronic Absenteeism: All- 15%, EL-20%, SED-20%
- * Suspension Rate: All- Below 4%, EL- Below 4%, SED- Below 4%
- * Provide a safe environment: Students- 90%
- * School Connectedness: Students- 68%
- * Provide resources to help students with personal issues: Students- 80%

Actions:

Action 2: Adding a school resource officer to the action.

Action 3: Moving from 1 full time contracted mental health professional to 1.5 contracted mental health professionals.

Action 8: Add an additional teacher (part time) to support attendance and monitor students during other means to suspension.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
3	College and Career Exploration- KJUHS D believes that all students should have the opportunity to explore both college and career options in order to be ready when they leave high school. Through the college and career center, career technical education (CTE) classes, AVID program, and Advanced placement classes students will be provided with multiple options to explore and prepare for the transition to post-secondary schooling/training. In addition the district will provide parent nights on supporting student success during high school and preparing for post-secondary. Measurement of this goal will be through % of CTE completers, number of dual enrolled classes, number of students earning dual enrollment credits, percent of students attending college or trade school and educational partner feedback.

An explanation of why the LEA has developed this goal.

College and career readiness is the goal of the district. Through educational partner meetings, a need was seen in having more options to help students achieve postsecondary success. The actions in the goal are focused on providing students options to help prepare for college (AP courses and AVID) and career (CTE classes) with the additional support of a credentialed teacher in the college and career center to work with students and parents on the transition. Through the district survey college and career remains a high priority for educational partners.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
% of graduating seniors enrolled in trade school, community college, or 4-year college	86% Data Year: 2019-20 Data Source: Local Data	77% Data Year: 2020-21 Data Source: Local Data	85% Data Year: 2021-22 Data Source: Local Data		88% Data Year: 2022-23 Data Source: Local Data

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	Parent and Student Participation	As demonstrated in educational partner feedback and local data, parent participation from English learners and low income students is lower than that of other students in the district. Parent survey showed a .1% increase in good communication and student survey showed a decrease of 3.7% from the year before, student survey data shows a decrease in 1% in school connectedness and local data showed that few parents of identified students attended the Parent Advisory Committee and the DELAC/ELAC meetings. Parent feedback indicated the need to provide multiple methods of parent communication for parents, including providing translation services, upgrading the parent communication system through the student information system, providing incentives for parents and offering more parenting classes. Local analysis of data shows low income and English Learner students do not feel communication is as good and feel less connected to school. In providing additional parental and student involvement opportunities such as Freshman Orientation Night, Senior Survival Night, Financial Aid, and College and Career Night, parents will be able to better support and encourage student attendance and academic success and students will have more opportunities to become connected to school. The district expects that by providing these services that the parent participation rates of the identified student groups will increase and student's sense of school connectedness will increase, as the supports and programs is designed to meet the needs most associated with experiences of low income and English learners. However, because all parents and students could benefit from increased participation in school functions, this action is provided on a district-wide basis. KJUHSD expects that parent rating on communication will improve for the following three years, student communication will increase for the following 3 years and school connectedness will increase for the following three years.	\$43,109.00	Yes
3.2	Technology- targeted	A need that has been exacerbated by the pandemic for low income students compared to other students in the district is access to technology and internet connections, which impacts a student's academic achievement as demonstrated in the metrics section above. Local data shows that our low-income students did not have	\$342,457.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>consistent and reliable internet access. Unreliable internet limits student access to extended resources, the ability to connect with school, and expanded learning opportunities. To address this need, the district will continue to provide computers, internet connections and have additional technology personnel to support students both at school and at home. By providing these services, the identified students will be able to engage in class work at home and develop academic skills needed for post secondary employment, We expect the academic performance of the identified students to increase, as the program is designed to meet the needs most associated with the experiences of low-income students. However, because we expect that not all students will have access to technology and reliable internet, this action is provided on a district-wide basis.</p>		
3.3	Career Technical Education	Provide a variety of career technical classes and pathways to support students.	\$311,489.00	No
3.4	Advanced Placement Courses	<p>As demonstrated in the metrics section and educational partner feedback section, AP data and educational partner feedback identify that English learners, low income, and foster students, especially those who qualify for special education services and who are homeless have a lower participation and passing rate than for all students. Low income students had a higher passing rate, an increase of 29.1% compared to the previous year and this need is to maintain the growth we experienced last year. An analysis of root causes shows that our identified students need to increase participation and passing rates in AP courses and providing equity in access to course enrollment as well as specific professional learning opportunities for teachers is intended to help meet this need. To address this need the district will eliminate barriers such as a policy of all Advanced placement courses be open to all students and provide a continuous cycle of professional development for advanced placement teachers. In providing a continuous cycle of professional development for teachers, they will be able to stay current with new instructional</p>	\$10,500.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>techniques, changes in curriculum and access to resources that support student success to ensure the identified students have access to rigorous classes. We expect that the identified students AP participation and passing rate to increase, as the support is designed to meet the needs most associate with the experiences of low-income and English learners. However, because of the lower passing rate for all students, this action is provided on an district-wide basis. KJUHSD expects that participation rates and passing rates for our groups mentioned above will increase by 2% for the following three years.</p>		
3.5	College and Career Center	<p>As demonstrated in the metrics section and education partner feedback, A-G completion and EAP results for ELA and math identify that low-income and English learners are not meeting the same rate as all students. EAP ELA for low-income is 18.2%, 6.6% lower and English Learners is 0%, 24.8% lower than the rate for all students. EAP Math for low-income is 5.9, 6.3% lower and English Learners is 0%, 12.2% lower than the rate for all students. A needs assessment revealed that the listed groups are the most unfamiliar with how to navigate and access college and post-secondary opportunities. To address this need, the district will provide a college and career teacher to support the process of preparing students for post secondary. In providing additional college and career services, identified students will have access to a four year plan to support post secondary goals, college representatives, college and career fairs, support with FAFSA and college admissions, and access to the ASVAB test. The district expects A-G completion and EAP results to increase for the identified students, as the program is designed to meet the needs most associated with the stresses and experiences of low-income and English learners. However, because not all students have the necessary support for navigating college, this action is provided on an district-wide basis. KJUHSD expects that A-G completion and EAP rates to increase by 3% for the following three years.</p>	\$149,328.00	Yes

Action #	Title	Description	Total Funds	Contributing
3.6	AVID	Maintain the AVID program to help students become college ready by developing academic skills.	\$127,210.00	No
3.7	Technology	Provide technology on campus to support students.	\$100,513.00	No

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The LEA used the following rating scale to determine the effectiveness of the implementation of the actions as planned. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Three helped make progress towards the LEA's goal: KJUHSD believes that all students should have the opportunity to explore both college and career options in order to be ready when they leave high school. Through the college and career center, career technical education (CTE) classes, AVID program, and Advanced placement classes students will be provided with multiple options to explore and prepare for the transition to post-secondary schooling/training. In addition the district will provide parent nights on supporting student success during high school and preparing for post-secondary.

Action 1: Parent and Student Participation

Implementation Status: 3- Effective. Communication with families was a focus of the district. Communication was provided in multiple ways (Parent Square, social media, marquee, and teacher emails) and parent nights were well attended. The addition of providing dinner seemed to encourage more parents to participate. The district provided a family/community night where the speaker focused on drug abuse and mental health in students. No substantive difference in planned action compared to the actual implementation.

Action 2: Technology

Implementation Status: 3- Effective. Students were provided with computers and students needing wifi to access internet at home were provided hot spots. Through one time funding, teachers were able to update the technology in their classrooms to better support student engagement. No substantive difference in planned action compared to the actual implementation.

Action 3: Career Technical Education

Implementation Status: 3- Effective. CTE courses and classes were provided. Two new CTE courses were added to provide students with more options. No substantive difference in planned action compared to the actual implementation.

Action 4: Advanced Placement Courses

Implementation Status: 2- Somewhat Effective. Students had access to AP courses. The district covered the costs of the AP tests who were eligible to a fee waiver. The district offered AP training to staff, but due to circumstances, no teachers were able to attend AP training over the summer.

Action 5: College and Career Center

Implementation Status: 3- Effective. The college and Career Center provided services throughout the school year to support students. Students had access to career specific speakers, college representatives, and college/career day. Two family FAFSA nights were provided, the local community college district came to campus to get students enrolled and registered, and students applying to four year colleges were support in their applications. The college and career center also encouraged seniors to apply to the numerous scholarships. No substantive difference in planned action compared to the actual implementation.

Action 6: AVID

Implementation Status: 3- Effective. The AVID program was provided to students. No substantive difference in planned action compared to the actual implementation.

Overall Successes: Kingsburg JUHSD focus on the actions in goal three were overall successful. A continued success is providing technology for students and staff, in addition to wifi for students who do not have access to the internet at home. The College and Career Center keeps adapting to the needs of the students and offer a variety of college and career opportunities that are tailored to students and not whole school presentations.

Overall Challenges: Kingsburg JUHSD has had a challenge with consistent professional development for AP teachers. Between trainings being offered online and unexpected life issues, there has not been a consistent training. The district plans on offering opportunities during the school year in addition to summer to provide professional development for teachers. Parent participation has not been consistent. More parents are attending group meetings, but special meetings (ELAC/DELAC, PAC, guest speakers) those are still not highly attended.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 2: Technology- Expenditures were exceeded. The cost of technology was higher than expected.

Action 3: Career Technical Education- Did not meet expenditures. The original estimate provided from VROP was higher. After the LCAP was written, an updated about was provided because they received additional funding that lowered our cost.

Action 4: Advanced Placement Courses- Did not meet expenditures. Two factors played into the lower amount. First, two teachers who were planning on attending AP summer training had family emergencies and were not able to attend. Second, the district planned a larger

amount of money to cover AP test cost for students who are SED, the cost came in lower than anticipated. So all students needing financial support for AP tests were met. The district will once again offer professional development training for AP teachers, including the option to attend during the school year.

An explanation of how effective the specific actions were in making progress toward the goal.

The LEA used the following rating scale to determine the effectiveness of the actions to achieve the articulated goal. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Three helped make progress towards the LEA's goal: KJUHSD believes that all students should have the opportunity to explore both college and career options in order to be ready when they leave high school. Through the college and career center, career technical education (CTE) classes, AVID program, and Advanced placement classes students will be provided with multiple options to explore and prepare for the transition to post-secondary schooling/training. In addition the district will provide parent nights on supporting student success during high school and preparing for post-secondary.

Actions:

Action 1: Parent and Student Participation

Effectiveness of Actions: 2- Somewhat Effective

Metrics: Parent Communication, Supporting staff to learn about families, parent/community LCAP survey

* Communication- 2.2% increase

* Supporting Staff about families: .72 decrease on a scale of 5

* Parent/community Survey: 1% survey decrease

Action 2: Technology , Action 3: Career Technical Education, Action 4: Advanced Placement Courses, Action 5: College and Career Center, Action 6: AVID

Effectiveness of Actions: 2- Somewhat Effective

Metrics: % enrolled in college, % of CTE pathway completers, # of dual enrolled course, # of students earning dual enrollment

* % enrolled in college- 8% increase

* % CTE pathways Completers- 4.18% decrease

* Number of Dual Enrolled Courses- 1 course decrease

* Number of dual enrollment credits- 13 student decrease

Analysis Statement: Kingsburg JUHSD saw mixed results on the metrics. The trend of students enrolling in college increased from the prior year. Results related to CTE pathway completers, dual enrolled courses and dual enrollment credits all decreased. This is most likely a result of errors in reporting courses correctly to CALPADS. After data was submitted, it was found that dual enrolled courses were not coded

correctly and were not counted. A decrease in CTE completers is believed to be due to students not having access to all CTE courses during the hybrid school year. The district saw an increase in parents feeling communication was good, but felt the school was not supporting teachers as much to understand families as previous years. The number of surveys completed by parents/community continued to decrease. Actions related to the College and Career Center and Advance Placement courses help lead to an increase in the number of students attending college, in addition of seeing an increase in the number of SED students passing the AP test. Parent participation saw an increase in communication with the the school and that the school treats parents in a way that makes them feel respected.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Metrics section was updated to reflect current data and adjusted desired outcomes to reflect the impacts the pandemic had on education. When original desired outcomes were created, the goal was to reach and exceed pre-pandemic levels. The LEA is understanding the impact the pandemic has had on students and are adjusting the metrics to a level that is more achievable.

* % of graduating seniors enrolled in trade school, community college, or 4-year college: 88%

* Dual Enrolled Course: 13

* Number of students earning dual enrollment credits: 175

* Parent communication: 93%

* Supporting staff to learn about families: 3.5

* Parent/community LCAP surveys: 100

Data sources were amended due to an error in information uploaded to CALPADS. Used local data to reflect the correct number.

* Number of students earning dual enrollment credits

Actions:

Action 2 was split into two separate actions to provide clarity to what money was being spent under LCFF and what was being spent as improved services. The new action 2 will focus on money services and money spent to improve services in the area of targeted technology.

Action 7: This is the additional action to help provide clarity. This action will focus on technology to all students.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
4	Provide professional development and collaboration time that builds student achievement- KJUHS D recognizes the importance of providing professional development to teachers and staff to help meet the needs of our students. Through professional development training on campus and off, in addition to collaboration release time, teachers and staff will be better prepared to engage students and improve students achievement and graduation success. Measure of this data will be through educational partner feedback on the local priorities.

An explanation of why the LEA has developed this goal.

Student success is driven by teachers prepared to engage and teach students. Teachers have also requested more professional development in the area of engagement, preparation for CAASPP, social emotional learning, use of technology, and time to collaborate with peers. District surveys continue to show that professional development was important goal for the district.

Measuring and Reporting Results

Actions

Action #	Title	Description	Total Funds	Contributing
4.1	Professional Development	As demonstrated in the identified need and metric sections, CAASPP ELA and math data, graduation data, and A-G completion rates, and educational partner feedback, identify low income students and English learners have lower academic achievement and graduation rates than compared to all students. A needs analysis and teacher feedback identified that teachers and staff need continuous professional development training, release time to analyze data, time for collaboration with peers and to adjust instructional strategies to close the academic gap and increase graduation and A-G completion rates of the identified students. In providing professional development and collaboration time, teachers will be better prepared to identify the academic gaps of the above groups and provide intervention to close the academic gap. The district expects the CAASPP ELA, Math, graduation rate and A-G completion rate to increase, as the program is designed to provide teachers time to analyze and target the specific needs of low-income and English learners. However, because we expect to identify the individual needs of all students, this action is provided on a district-wide basis. KJUHSD expects that for the listed groups CAASPP will be increased, graduation will be increase and A-G completion rates will increase for the following three years.	\$173,947.00	Yes

Action #	Title	Description	Total Funds	Contributing
4.2	Data Management Systems	Purchase/Contract with data management system to create benchmark exams, analyze local and state assessments, and monitor students' progress.	\$12,000.00	No
4.3	Professional Development for ELD	As demonstrated in the metrics sections and educational feedback section, ELPAC data and reclassification rate, English learners are struggling to be reclassified. Reclassification rate for the previous year was 13.9%, but on the California Dashboard students progressing toward English Learning Progress was very low. A local needs assessment revealed that teachers needed coaching and professional development for designated and integrated ELD. Professional development will be provided to staff during designated PLC time so that they can focus on learning strategies to best support English Learners. We expect these supports will increase the number of students being eligible to be reclassified and the number of students being reclassified.	\$10,000.00	Yes
4.4	Professional Development for AVID	As demonstrated in the identified needs, metrics and educational partner feedback sections, show low income students have lower rates of meeting A-G requirements, academic achievement and graduation rates compared to all students. An analysis of root causes show that low income students would benefit from evidenced based instruction in the areas of writing, inquiry, collaboration, organization, and reading. To address this need the district will provide continuous professional development for teachers through the AVID program. The AVID program is a nationally recognized program that supports students with the skills for college and career readiness, including the academic preparedness skills to achieve grade-level proficiency in ELA, Math and other A-G subjects. The program also provides teachers with instructional strategies that help students to set and achieve goals through increased organization and study skills. We expect that CAASSP, EAP, graduation and A-G completion rates will all increase, action is designed to meet the needs most associated with the stresses and experiences of low-income	\$8,300.00	Yes

Action #	Title	Description	Total Funds	Contributing
		<p>students. However, because we expect that all students showing lower academic performance will benefit, this action is provided on a district-wide basis. KJUHS D expects that for the listed groups CAASPP will be increased, EAP will be increase, graduation will be increase and A-G completion rates will increase for the following three years.</p>		
<p>4.5</p>	<p>Mentor support for new teachers</p>	<p>As demonstrated in the metrics section, CAASPP ELA and Math, and graduation data identify English learners, low income, and foster students, especially those who qualify for special education services and who are homeless are not performing at the same performance rate of all students. An analysis of root causes show that new teachers often lack support and experience required to address the specific needs of the identified students. To address this need, the district will provide a mentor teacher for teachers with fewer than two years of experience and any new teacher to the district. In providing the mentors, the new teachers will be able to develop their instructional strategies targeted to meet the needs of the identified student groups and have a support person on campus to help learn the expectations of the district. It is our expectation that professional development through personalized mentorship will increase the effectiveness of inexperienced and new teachers in supporting the identified students in decreasing the achievement gap, as the program is designed to meet the needs most associated with the experiences of the above groups. However, because we expect that all students will benefit by more prepared new teachers, this action is provided on a district-wide basis. KJUHS D expects that for the listed groups CAASPP will be increased by 3%, graduation will be increase by 2% for the following three years.</p>	<p>\$8,295.00</p>	<p>Yes</p>

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The LEA used the following rating scale to determine the effectiveness of the implementation of the actions as planned. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Four helped make progress towards the LEA's goal: KJUHSD recognizes the importance of providing professional development to teachers and staff to help meet the needs of our students. Through professional development training on campus and off, in addition to collaboration release time, teachers and staff will be better prepared to engage students and improve students achievement and graduation success.

Action 1: Professional Development

Implementation Status: 3-Effective. The district had two teachers support staff with professional development, instead of the original 1 planned. This allowed for more diverse professional development, in addition to individual trainings based on teacher need.

Action 2: Data Management Systems

Implementation Status: 3-Effective. The district continued to use a data management system that allowed teachers to create benchmarks, tests, and quizzes to be able to analyze student progress during the year. Departments had time during PLC time on Monday's to review this data.

Action 3: Professional Development for ELD

Implementation Status: 2 Somewhat Effective. The district provided teachers with an online professional development tool that allowed teachers to strategies based directly on their individual student need. Teachers were also given the opportunity to attend in person trainings.

Action 4: Professional Development for AVID

Implementation Status: 3-Effective. The district had multiple teachers attend AVID summer institute either in person or online. These trainings were both for current AVID elective teachers and teachers who wanted to learn more about AVID instructional strategies targeting the needs of the identified student group.

Action 5: Mentor support for new teachers

Implementation Status: 3- Effective. The district was able to support both a new teacher to education, in addition to two new teachers to the district.

Overall Successes: Kingsburg JUHSD focus on the actions in goal four were overall successful. A continued focus on supporting new teachers is key in maintaining our longevity of teachers in the district. The addition of an additional teacher to provide individual professional

development helped allow the district to provide a more individualized support to teachers. AVID continues to be an area where both AVID elective teachers and other teachers want to learn more about strategies to support student learning.

Overall Challenges: Kingsburg JUHSD continues to struggle with supporting EL students in a way that is reflected through improvement on the ELPAC. The district offered a new online professional development model that focused on individual students, but more focused training is needed to ensure teachers are using it to support their instruction in the classroom.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Action 1: Professional Development- Expenditures were exceeded. The district had an additional person provide professional development to the staff.

Action 5: Mentor support for new teacher- Expenditures were exceeded. The district ended up hiring a new teacher as a teacher resigned right before the school year that required support that was not originally planned at the writing of the 22-23 LCAP.

An explanation of how effective the specific actions were in making progress toward the goal.

The LEA used the following rating scale to determine the effectiveness of the actions to achieve the articulated goal. Ratings were based on the analysis of both inputs from educational partners and metrics.

Rating Scale (lowest to highest): 1- Not Effective; 2- Somewhat Effective; 3- Effective

The actions outlined in Goal Four helped make progress towards the LEA's goal: KJUHSD recognizes the importance of providing professional development to teachers and staff to help meet the needs of our students. Through professional development training on campus and off, in addition to collaboration release time, teachers and staff will be better prepared to engage students and improve students achievement and graduation success.

Actions:

Action 1: Professional Development; Action 2: Data Management Systems; Action 3: Professional Development for ELD; Action 4: Professional Development for AVID; Action 5: Mentor support for new teachers.

Effectiveness of Actions: 2- Somewhat Effective

Metrics: Broad Course of Study, Implementation of Standards for all students and EL; Professional Learning

Kingsburg JUHSD saw a decrease in the number of students participating in AP, CTE and VAPA courses. The district also saw a decrease in the implementation of standards for all students and enable EL's access to CCSS and ELD standards. Teachers though felt that they were more supported as a group and individually on their professional learning.

- * Broad Course of Study

- * AP course

All- # of students decreased

EL- # of students decreased

SED- # of students decreased

- * CTE

All- # of students decreased

EL- # of students decreased

SED- # of students increased

- * VAPA

All- # of students decreased

EL- # of students decreased

SED- # of students increased

- * Implementation of standards

- * CCSS (core standards for all students)

- * A .25 decrease on a scale of 5

- * ELD Implementation

- * A .72 decrease on a scale of 5

- * Professional Learning

- * Professional Learning as a group

- * A .35 increase on a scale of 5

- * Professional learning needs of individuals

- * A .34 increase on a scale of 5

- * Professional support on standards not met

- * A .28 increase on a scale of 5

Analysis Statement: Metric data comparing 2022-23 and 2021-22 may be a little off as the district started to calculate only duplicated students and not unduplicated. There was also some coding errors that may have skewed the data results. Though with that said, the district will continue to monitor the number of students enrolled in these classes to make sure students are accessing a wide variety of courses. Implementation of core standards and ELD implementation continue to be an area where the district fluctuates. There has been no consistency in ratings from teachers, as one year we see a large increase and then the following year we see a decrease. The district will need to make this a focused discussion at department chair meetings to ensure they feel they are supported to improve to full implementation consistently on rating scales. ELD will also need to be a continued focus as EL data from these metrics and metrics in other goals show they are not making the progress they should be. The increase in support teachers felt for professional learning is a step in the

right direction. This will help guide the district in upcoming professional learning and continued support for both group and individual training. The AVID program has shown positive steps in improving low income students with a increase in AP passing rate, high school graduation rate and maintaining A-G requirements. The action related to EL professional development has show some progress, as reclassification rates have increased, but our English Language Learner progress is still very low. Additional support is needed for teachers on using the new online instructional strategies to use with their EL students.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Metrics section was updated to reflect current data and adjusted desired outcomes to reflect the impacts the pandemic had on education. When original desired outcomes were created, the goal was to reach and exceed pre-pandemic levels. The LEA is understanding the impact the pandemic has had on students and are adjusting the metrics to a level that is more achievable.

* Broad Course of Study: AP: All- 260, EL= 4, SED= 100 duplicated. CTE: SED= 550 duplicated. VAPA: SED=duplicated

* Implementation of standards: CCSS= 4.0, full implementation. ELD Implementation= 4.0, full implementation

* Professional Learning: As a group= 4.0, full implementation. Individuals= 4.0, full implementation. Standards not met= 4.0, full implementation

Actions:

No changes were made to actions.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2023-24]

Projected LCFF Supplemental and/or Concentration Grants	Projected Additional LCFF Concentration Grant (15 percent)
\$2,822,764	\$221,239

Required Percentage to Increase or Improve Services for the LCAP Year

Projected Percentage to Increase or Improve Services for the Coming School Year	LCFF Carryover — Percentage	LCFF Carryover — Dollar	Total Percentage to Increase or Improve Services for the Coming School Year
19.79%	0.00%	\$0.00	19.79%

The Budgeted Expenditures for Actions identified as Contributing may be found in the Contributing Actions Table.

Required Descriptions

For each action being provided to an entire school, or across the entire school district or county office of education (COE), an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

The actions listed below are being provided on a “wide” basis to maximize efficiency and effectiveness and streamline implementation so that targeted support can be provided to the specific identified unduplicated group(s) in each action, while allowing other students to also benefit as/if needed. We expect that by providing these actions/services to meet the unique needs of our English learner, foster youth, and/or low-income students, the LEA will achieve the anticipated outcomes targeted to meet each identified student group’s stated need(s).

The required justification for how the district is increasing and improving services for the specified unduplicated student group(s) are contained in the action description in the Goals and Actions section of this plan. In the Goals and Actions section of this plan, each action marked as “wide” contains a detailed explanation of how that action is principally directed toward the English learner, foster youth, and/or low-income student population and effective in helping close equity and performance gaps.

Each “wide” action in this plan will meet this requirement by: (1) Identifying it as a contributing action, (2) Clearly articulating how the needs of our foster youth, English learners, and or low-income students were considered first, including how the action considers those needs through its design, content, method, location, or another attribute, and (3) Explaining how the action is effective in meeting the goal and the identified student group(s) needs. This unique approach was taken after consultation and input from our educational partners and other interested

partners. Our intention in doing this was to increase transparency for our educational partners so they can better understand the rationale behind each “wide” action. We find this approach to be very transparent and well received by our community.

The contributing action titles are:

Goal 1, Action 2- Credential teachers for English and math supplemental support

Goal 1, Action 4- School Intervention, with after school transportation

Goal 1, Action 5- Summer school with transportation

Goal 1, Action 7- Library media services

Goal 1, Action 8- Intervention class

Goal 1, Action 9- English Language Development Program

Goal 1, Action 10- Data Accountability

Goal 1, Action 11- Instructional Aides

Goal 2, Action 1- Behavior supports

Goal 2, Action 3- Mental Health Services

Goal 2, Action 7- 9th grade mentor program

Goal 2, Action 8- Attendance intervention specialist

Goal 2, Action 9- School safety monitor

Goal 2, Action 10- After school transportation for athletics

Goal 2, Action 11- Custodial Staff

Goal 3, Action 1- Parent and student participation

Goal 3, Action 2- Technology

Goal 3, Action 4- Advance placement courses

Goal 3, Action 5- College and career center

Goal 4, Action 1- Professional Development

Goal 4, Action 3- Professional Development for ELD

Goal 4, Action 4- Professional Development for AVID

Goal 4, Action 5- Mentor support for new teachers

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

Our LEA has demonstrated it has met the identified required minimum proportionality percentage by providing increased/improved services for our English learners, foster youth, and/or low-income students equivalent to or greater than the required proportionality percentage based on the contributing actions/services in this plan and as demonstrated in the action tables. We are meeting the minimum proportionality percentage by providing the actions/services principally directed toward the unduplicated student population as summarized in the prompt above and justified in detail in each contributing action description, as applicable, within this plan. Our intent in using this approach is to justify how each contributing action is principally directed and effective within each of action description and meets or exceeds requirements for the “principally directed and effective threshold” as well as contributing toward meeting the Minimum Proportionality Percentage (MPP) requirement. These actions/services are most transparently communicated and understood by our educational partners through the approach we use in this plan which involves exactly how each action is principally directed and effective within the language and particular context of specific contributing action language. Building on the information provided in the prompt response above, if limited actions/services are included in this plan, they are identified below as contributing to increasing or improving services for English learners, foster youth, and/or low-income students and contribute toward meeting the minimum proportionality percentage. We are using the increased funding to increase/improve services as described for our LEA-wide and school-wide services in prompt one and as described below for each of the student groups on a limited basis:

- Goal 1, Action 9- English Language Development Program
- Goal 4, Action 3- Professional Development for English Learners

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

To increase the number of staff providing direct services to students at schools that have a high concentration of foster youth, English learners, and low-income students Kingsburg Joint Union High School District will continue three new goals. Goal 1 Action 10- data accountability person who will provide services at Kingsburg High School as the number of high concentration students is higher compared to the other two schools.. Goal 1 Action 11- Instructional aide will provide services at Kingsburg High School as the number of high concentration students is higher compared to the other two schools. Goal 2 Action 10- Custodial staff will provide services at Kingsburg High School as the number of high concentration students is higher compared to the other two schools.

Staff-to-student ratios by type of school and concentration of unduplicated students	Schools with a student concentration of 55 percent or less	Schools with a student concentration of greater than 55 percent
Staff-to-student ratio of classified staff providing direct services to students	N/A	N/A
Staff-to-student ratio of certificated staff providing direct services to students	N/A	N/A

[Goals and Actions](#)

[Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students](#)

For additional questions or technical assistance related to the completion of the Local Control and Accountability Plan (LCAP) template, please contact the local county office of education (COE), or the California Department of Education's (CDE's) Local Agency Systems Support Office, by phone at 916-319-0809 or by email at lcff@cde.ca.gov.

Introduction and Instructions

The Local Control Funding Formula (LCFF) requires local educational agencies (LEAs) to engage their local educational partners in an annual planning process to evaluate their progress within eight state priority areas encompassing all statutory metrics (COEs have 10 state priorities). LEAs document the results of this planning process in the LCAP using the template adopted by the State Board of Education.

The LCAP development process serves three distinct, but related functions:

- **Comprehensive Strategic Planning:** The process of developing and annually updating the LCAP supports comprehensive strategic planning (California *Education Code* [EC] Section 52064[e][1]). Strategic planning that is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students.
- **Meaningful Engagement of Educational Partners:** The LCAP development process should result in an LCAP that reflects decisions made through meaningful engagement (EC Section 52064[e][1]). Local educational partners possess valuable perspectives and insights about an LEA's programs and services. Effective strategic planning will incorporate these perspectives and insights in order to identify potential goals and actions to be included in the LCAP.
- **Accountability and Compliance:** The LCAP serves an important accountability function because aspects of the LCAP template require LEAs to show that they have complied with various requirements specified in the LCFF statutes and regulations, most notably:
 - Demonstrating that LEAs are increasing or improving services for foster youth, English learners, and low-income students in proportion to the amount of additional funding those students generate under LCFF (EC Section 52064[b][4-6]).
 - Establishing goals, supported by actions and related expenditures, that address the statutory priority areas and statutory metrics (EC sections 52064[b][1] and [2]).
 - Annually reviewing and updating the LCAP to reflect progress toward the goals (EC Section 52064[b][7]).

The LCAP template, like each LEA’s final adopted LCAP, is a document, not a process. LEAs must use the template to memorialize the outcome of their LCAP development process, which should: (a) reflect comprehensive strategic planning (b) through meaningful engagement with educational partners that (c) meets legal requirements, as reflected in the final adopted LCAP. The sections included within the LCAP template do not and cannot reflect the full development process, just as the LCAP template itself is not intended as a tool for engaging educational partners.

If a county superintendent of schools has jurisdiction over a single school district, the county board of education and the governing board of the school district may adopt and file for review and approval a single LCAP consistent with the requirements in *EC* sections 52060, 52062, 52066, 52068, and 52070. The LCAP must clearly articulate to which entity’s budget (school district or county superintendent of schools) all budgeted and actual expenditures are aligned.

The revised LCAP template for the 2021–22, 2022–23, and 2023–24 school years reflects statutory changes made through Assembly Bill 1840 (Committee on Budget), Chapter 243, Statutes of 2018. These statutory changes enhance transparency regarding expenditures on actions included in the LCAP, including actions that contribute to meeting the requirement to increase or improve services for foster youth, English learners, and low-income students, and to streamline the information presented within the LCAP to make adopted LCAPs more accessible for educational partners and the public.

At its most basic, the adopted LCAP should attempt to distill not just what the LEA is doing for students in transitional kindergarten through grade twelve (TK–12), but also allow educational partners to understand why, and whether those strategies are leading to improved opportunities and outcomes for students. LEAs are strongly encouraged to use language and a level of detail in their adopted LCAPs intended to be meaningful and accessible for the LEA’s diverse educational partners and the broader public.

In developing and finalizing the LCAP for adoption, LEAs are encouraged to keep the following overarching frame at the forefront of the strategic planning and educational partner engagement functions:

Given present performance across the state priorities and on indicators in the California School Dashboard (Dashboard), how is the LEA using its budgetary resources to respond to TK–12 student and community needs, and address any performance gaps, including by meeting its obligation to increase or improve services for foster youth, English learners, and low-income students?

LEAs are encouraged to focus on a set of metrics and actions that the LEA believes, based on input gathered from educational partners, research, and experience, will have the biggest impact on behalf of its TK–12 students.

These instructions address the requirements for each section of the LCAP, but may include information about effective practices when developing the LCAP and completing the LCAP itself. Additionally, information is included at the beginning of each section emphasizing the purpose that each section serves.

Plan Summary

Purpose

A well-developed Plan Summary section provides a meaningful context for the LCAP. This section provides information about an LEA’s community as well as relevant information about student needs and performance. In order to provide a meaningful context for the rest of the LCAP, the content of this section should be clearly and meaningfully related to the content included in the subsequent sections of the LCAP.

Requirements and Instructions

General Information – Briefly describe the LEA, its schools, and its students in grades TK–12, as applicable to the LEA. For example, information about an LEA in terms of geography, enrollment, or employment, the number and size of specific schools, recent community challenges, and other such information as an LEA wishes to include can enable a reader to more fully understand an LEA’s LCAP.

Reflections: Successes – Based on a review of performance on the state indicators and local performance indicators included in the Dashboard, progress toward LCAP goals, local self-assessment tools, input from educational partners, and any other information, what progress is the LEA most proud of and how does the LEA plan to maintain or build upon that success? This may include identifying specific examples of how past increases or improvements in services for foster youth, English learners, and low-income students have led to improved performance for these students.

Reflections: Identified Need – Referring to the Dashboard, identify: (a) any state indicator for which overall performance was in the “Red” or “Orange” performance category or any local indicator where the LEA received a “Not Met” or “Not Met for Two or More Years” rating AND (b) any state indicator for which performance for any student group was two or more performance levels below the “all student” performance. What steps is the LEA planning to take to address these areas of low performance and performance gaps? An LEA that is required to include a goal to address one or more consistently low-performing student groups or low-performing schools must identify that it is required to include this goal and must also identify the applicable student group(s) and/or school(s). Other needs may be identified using locally collected data including data collected to inform the self-reflection tools and reporting local indicators on the Dashboard.

LCAP Highlights – Identify and briefly summarize the key features of this year’s LCAP.

Comprehensive Support and Improvement – An LEA with a school or schools identified for comprehensive support and improvement (CSI) under the Every Student Succeeds Act must respond to the following prompts:

- **Schools Identified:** Identify the schools within the LEA that have been identified for CSI.
- **Support for Identified Schools:** Describe how the LEA has or will support the identified schools in developing CSI plans that included a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities to be addressed through the implementation of the CSI plan.
- **Monitoring and Evaluating Effectiveness:** Describe how the LEA will monitor and evaluate the implementation and effectiveness of the CSI plan to support student and school improvement.

Engaging Educational Partners

Purpose

Significant and purposeful engagement of parents, students, educators, and other educational partners, including those representing the student groups identified by LCFF, is critical to the development of the LCAP and the budget process. Consistent with statute, such engagement should support comprehensive strategic planning, accountability, and improvement across the state priorities and locally identified priorities (*EC* Section 52064[e][1]). Engagement of educational partners is an ongoing, annual process.

This section is designed to reflect how the engagement of educational partners influenced the decisions reflected in the adopted LCAP. The goal is to allow educational partners that participated in the LCAP development process and the broader public understand how the LEA engaged educational partners and the impact of that engagement. LEAs are encouraged to keep this goal in the forefront when completing this section.

Statute and regulations specify the educational partners that school districts and COEs must consult when developing the LCAP: teachers, principals, administrators, other school personnel, local bargaining units of the LEA, parents, and students. Before adopting the LCAP, school districts and COEs must share it with the Parent Advisory Committee and, if applicable, to its English Learner Parent Advisory Committee. The superintendent is required by statute to respond in writing to the comments received from these committees. School districts and COEs must also consult with the special education local plan area administrator(s) when developing the LCAP.

Statute requires charter schools to consult with teachers, principals, administrators, other school personnel, parents, and students in developing the LCAP. The LCAP should also be shared with, and LEAs should request input from, schoolsite-level advisory groups, as applicable (e.g., schoolsite councils, English Learner Advisory Councils, student advisory groups, etc.), to facilitate alignment between schoolsite and district-level goals and actions.

Information and resources that support effective engagement, define student consultation, and provide the requirements for advisory group composition, can be found under Resources on the following web page of the CDE's website: <https://www.cde.ca.gov/re/lc/>.

Requirements and Instructions

Below is an excerpt from the 2018–19 *Guide for Annual Audits of K–12 Local Education Agencies and State Compliance Reporting*, which is provided to highlight the legal requirements for engagement of educational partners in the LCAP development process:

Local Control and Accountability Plan:

For county offices of education and school districts only, verify the LEA:

- a) Presented the local control and accountability plan to the parent advisory committee in accordance with Education Code section 52062(a)(1) or 52068(a)(1), as appropriate.
- b) If applicable, presented the local control and accountability plan to the English learner parent advisory committee, in accordance with Education Code section 52062(a)(2) or 52068(a)(2), as appropriate.

- c) Notified members of the public of the opportunity to submit comments regarding specific actions and expenditures proposed to be included in the local control and accountability plan in accordance with Education Code section 52062(a)(3) or 52068(a)(3), as appropriate.
- d) Held at least one public hearing in accordance with Education Code section 52062(b)(1) or 52068(b)(1), as appropriate.
- e) Adopted the local control and accountability plan in a public meeting in accordance with Education Code section 52062(b)(2) or 52068(b)(2), as appropriate.

Prompt 1: “A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP.”

Describe the engagement process used by the LEA to involve educational partners in the development of the LCAP, including, at a minimum, describing how the LEA met its obligation to consult with all statutorily required educational partners as applicable to the type of LEA. A sufficient response to this prompt must include general information about the timeline of the process and meetings or other engagement strategies with educational partners. A response may also include information about an LEA’s philosophical approach to engaging its educational partners.

Prompt 2: “A summary of the feedback provided by specific educational partners.”

Describe and summarize the feedback provided by specific educational partners. A sufficient response to this prompt will indicate ideas, trends, or inputs that emerged from an analysis of the feedback received from educational partners.

Prompt 3: “A description of the aspects of the LCAP that were influenced by specific input from educational partners.”

A sufficient response to this prompt will provide educational partners and the public with clear, specific information about how the engagement process influenced the development of the LCAP. The response must describe aspects of the LCAP that were influenced by or developed in response to the educational partner feedback described in response to Prompt 2. This may include a description of how the LEA prioritized requests of educational partners within the context of the budgetary resources available or otherwise prioritized areas of focus within the LCAP. For the purposes of this prompt, “aspects” of an LCAP that may have been influenced by educational partner input can include, but are not necessarily limited to:

- Inclusion of a goal or decision to pursue a Focus Goal (as described below)
- Inclusion of metrics other than the statutorily required metrics
- Determination of the desired outcome on one or more metrics
- Inclusion of performance by one or more student groups in the Measuring and Reporting Results subsection
- Inclusion of action(s) or a group of actions
- Elimination of action(s) or group of actions
- Changes to the level of proposed expenditures for one or more actions

- Inclusion of action(s) as contributing to increased or improved services for unduplicated services
- Determination of effectiveness of the specific actions to achieve the goal
- Determination of material differences in expenditures
- Determination of changes made to a goal for the ensuing LCAP year based on the annual update process
- Determination of challenges or successes in the implementation of actions

Goals and Actions

Purpose

Well-developed goals will clearly communicate to educational partners what the LEA plans to accomplish, what the LEA plans to do in order to accomplish the goal, and how the LEA will know when it has accomplished the goal. A goal statement, associated metrics and expected outcomes, and the actions included in the goal should be in alignment. The explanation for why the LEA included a goal is an opportunity for LEAs to clearly communicate to educational partners and the public why, among the various strengths and areas for improvement highlighted by performance data and strategies and actions that could be pursued, the LEA decided to pursue this goal, and the related metrics, expected outcomes, actions, and expenditures.

A well-developed goal can be focused on the performance relative to a metric or metrics for all students, a specific student group(s), narrowing performance gaps, or implementing programs or strategies expected to impact outcomes. LEAs should assess the performance of their student groups when developing goals and the related actions to achieve such goals.

Requirements and Instructions

LEAs should prioritize the goals, specific actions, and related expenditures included within the LCAP within one or more state priorities. LEAs should consider performance on the state and local indicators, including their locally collected and reported data for the local indicators that are included in the Dashboard in determining whether and how to prioritize its goals within the LCAP.

In order to support prioritization of goals, the LCAP template provides LEAs with the option of developing three different kinds of goals:

- **Focus Goal:** A Focus Goal is relatively more concentrated in scope and may focus on a fewer number of metrics to measure improvement. A Focus Goal statement will be time bound and make clear how the goal is to be measured.
- **Broad Goal:** A Broad Goal is relatively less concentrated in its scope and may focus on improving performance across a wide range of metrics.
- **Maintenance of Progress Goal:** A Maintenance of Progress Goal includes actions that may be ongoing without significant changes and allows an LEA to track performance on any metrics not addressed in the other goals of the LCAP.

At a minimum, the LCAP must address all LCFF priorities and associated metrics.

Focus Goal(s)

Goal Description: The description provided for a Focus Goal must be specific, measurable, and time bound. An LEA develops a Focus Goal to address areas of need that may require or benefit from a more specific and data intensive approach. The Focus Goal can explicitly reference the metric(s) by which achievement of the goal will be measured and the time frame according to which the LEA expects to achieve the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA has chosen to prioritize this goal. An explanation must be based on Dashboard data or other locally collected data. LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners. LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.

Broad Goal

Goal Description: Describe what the LEA plans to achieve through the actions included in the goal. The description of a broad goal will be clearly aligned with the expected measurable outcomes included for the goal. The goal description organizes the actions and expected outcomes in a cohesive and consistent manner. A goal description is specific enough to be measurable in either quantitative or qualitative terms. A broad goal is not as specific as a focus goal. While it is specific enough to be measurable, there are many different metrics for measuring progress toward the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA developed this goal and how the actions and metrics grouped together will help achieve the goal.

Maintenance of Progress Goal

Goal Description: Describe how the LEA intends to maintain the progress made in the LCFF State Priorities not addressed by the other goals in the LCAP. Use this type of goal to address the state priorities and applicable metrics not addressed within the other goals in the LCAP. The state priorities and metrics to be addressed in this section are those for which the LEA, in consultation with educational partners, has determined to maintain actions and monitor progress while focusing implementation efforts on the actions covered by other goals in the LCAP.

Explanation of why the LEA has developed this goal: Explain how the actions will sustain the progress exemplified by the related metrics.

Required Goals

In general, LEAs have flexibility in determining what goals to include in the LCAP and what those goals will address; however, beginning with the development of the 2022–23 LCAP, LEAs that meet certain criteria are required to include a specific goal in their LCAP.

Consistently low-performing student group(s) criteria: An LEA is eligible for Differentiated Assistance for three or more consecutive years based on the performance of the same student group or groups in the Dashboard. A list of the LEAs required to include a goal in the LCAP based on student group performance, and the student group(s) that lead to identification, may be found on the CDE’s Local Control Funding Formula web page at <https://www.cde.ca.gov/fg/aa/lc/>.

- **Consistently low-performing student group(s) goal requirement:** An LEA meeting the consistently low-performing student group(s) criteria must include a goal in its LCAP focused on improving the performance of the student group or groups that led to the LEA’s eligibility for Differentiated

Assistance. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, this student group or groups. An LEA required to address multiple student groups is not required to have a goal to address each student group; however, each student group must be specifically addressed in the goal. This requirement may not be met by combining this required goal with another goal.

- **Goal Description:** Describe the outcomes the LEA plans to achieve to address the needs of, and improve outcomes for, the student group or groups that led to the LEA's eligibility for Differentiated Assistance.
- **Explanation of why the LEA has developed this goal:** Explain why the LEA is required to develop this goal, including identifying the student group(s) that lead to the LEA being required to develop this goal, how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the student group(s), and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes identified in the goal description.

Low-performing school(s) criteria: The following criteria only applies to a school district or COE with two or more schools; it does not apply to a single-school district. A school district or COE has one or more schools that, for two consecutive years, received the two lowest performance levels on all but one of the state indicators for which the school(s) receive performance levels in the Dashboard and the performance of the "All Students" student group for the LEA is at least one performance level higher in all of those indicators. A list of the LEAs required to include a goal in the LCAP based on school performance, and the school(s) that lead to identification, may be found on the CDE's Local Control Funding Formula web page at <https://www.cde.ca.gov/fg/aa/lc/>.

- **Low-performing school(s) goal requirement:** A school district or COE meeting the low-performing school(s) criteria must include a goal in its LCAP focusing on addressing the disparities in performance between the school(s) and the LEA as a whole. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, the students enrolled at the low-performing school or schools. An LEA required to address multiple schools is not required to have a goal to address each school; however, each school must be specifically addressed in the goal. This requirement may not be met by combining this goal with another goal.
- **Goal Description:** Describe what outcomes the LEA plans to achieve to address the disparities in performance between the students enrolled at the low-performing school(s) and the students enrolled at the LEA as a whole.
- **Explanation of why the LEA has developed this goal:** Explain why the LEA is required to develop this goal, including identifying the schools(s) that lead to the LEA being required to develop this goal; how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the school(s); and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes for students enrolled at the low-performing school or schools identified in the goal description.

Measuring and Reporting Results:

For each LCAP year, identify the metric(s) that the LEA will use to track progress toward the expected outcomes. LEAs are encouraged to identify metrics for specific student groups, as appropriate, including expected outcomes that would reflect narrowing of any existing performance gaps.

Include in the baseline column the most recent data associated with this metric available at the time of adoption of the LCAP for the first year of the three-year plan. LEAs may use data as reported on the 2019 Dashboard for the baseline of a metric only if that data represents the most recent available (e.g., high school graduation rate).

Using the most recent data available may involve reviewing data the LEA is preparing for submission to the California Longitudinal Pupil Achievement Data System (CALPADS) or data that the LEA has recently submitted to CALPADS. Because final 2020–21 outcomes on some metrics may not be computable at the time the 2021–24 LCAP is adopted (e.g., graduation rate, suspension rate), the most recent data available may include a point in time calculation taken each year on the same date for comparability purposes.

The baseline data shall remain unchanged throughout the three-year LCAP.

Complete the table as follows:

- **Metric:** Indicate how progress is being measured using a metric.
- **Baseline:** Enter the baseline when completing the LCAP for 2021–22. As described above, the baseline is the most recent data associated with a metric. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 1 Outcome:** When completing the LCAP for 2022–23, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 2 Outcome:** When completing the LCAP for 2023–24, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 3 Outcome:** When completing the LCAP for 2024–25, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above. The 2024–25 LCAP will be the first year in the next three-year cycle. Completing this column will be part of the Annual Update for that year.
- **Desired Outcome for 2023–24:** When completing the first year of the LCAP, enter the desired outcome for the relevant metric the LEA expects to achieve by the end of the 2023–24 LCAP year.

Timeline for completing the “**Measuring and Reporting Results**” part of the Goal.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for Year 3 (2023–24)
Enter information in this box when completing the LCAP for 2021–22 .	Enter information in this box when completing the LCAP for 2021–22 .	Enter information in this box when completing the LCAP for 2022–23 . Leave blank until then.	Enter information in this box when completing the LCAP for 2023–24 . Leave blank until then.	Enter information in this box when completing the LCAP for 2024–25 . Leave blank until then.	Enter information in this box when completing the LCAP for 2021–22 or when adding a new metric.

The metrics may be quantitative or qualitative; but at minimum, an LEA’s LCAP must include goals that are measured using all of the applicable metrics for the related state priorities, in each LCAP year as applicable to the type of LEA. To the extent a state priority does not specify one or more metrics (e.g., implementation of state academic content and performance standards), the LEA must identify a metric to use within the LCAP. For these state priorities, LEAs are encouraged to use metrics based on or reported through the relevant self-reflection tool for local indicators within the Dashboard.

Actions: Enter the action number. Provide a short title for the action. This title will also appear in the action tables. Provide a description of the action. Enter the total amount of expenditures associated with this action. Budgeted expenditures from specific fund sources will be provided in the summary tables. Indicate whether the action contributes to meeting the increase or improved services requirement as described in the Increased or Improved Services section using a “Y” for Yes or an “N” for No. (**Note:** for each such action offered on an LEA-wide or schoolwide basis, the LEA will need to provide additional information in the Increased or Improved Summary Section to address the requirements in *California Code of Regulations*, Title 5 [5 CCR] Section 15496(b) in the Increased or Improved Services Section of the LCAP).

Actions for English Learners: School districts, COEs, and charter schools that have a numerically significant English learner student subgroup must include specific actions in the LCAP related to, at a minimum, the language acquisition programs, as defined in *EC* Section 306, provided to students and professional development activities specific to English learners.

Actions for Foster Youth: School districts, COEs, and charter schools that have a numerically significant Foster Youth student subgroup are encouraged to include specific actions in the LCAP designed to meet needs specific to Foster Youth students.

Goal Analysis:

Enter the LCAP Year.

Using actual annual measurable outcome data, including data from the Dashboard, analyze whether the planned actions were effective in achieving the goal. Respond to the prompts as instructed.

- Describe the overall implementation of the actions to achieve the articulated goal. Include a discussion of relevant challenges and successes experienced with the implementation process. This must include any instance where the LEA did not implement a planned action or implemented a planned action in a manner that differs substantively from how it was described in the adopted LCAP.
- Explain material differences between Budgeted Expenditures and Estimated Actual Expenditures and between the Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services, as applicable. Minor variances in expenditures or percentages do not need to be addressed, and a dollar-for-dollar accounting is not required.
- Describe the effectiveness of the specific actions to achieve the articulated goal as measured by the LEA. In some cases, not all actions in a goal will be intended to improve performance on all of the metrics associated with the goal. When responding to this prompt, LEAs may assess the effectiveness of a single action or group of actions within the goal in the context of performance on a single metric or group of specific metrics within the goal that are applicable to the action(s). Grouping actions with metrics will allow for more robust analysis of whether the strategy the LEA is using to impact a specified set of metrics is working and increase transparency for educational partners. LEAs are encouraged to use such an approach when goals include multiple actions and metrics that are not closely associated.
- Describe any changes made to this goal, expected outcomes, metrics, or actions to achieve this goal as a result of this analysis and analysis of the data provided in the Dashboard or other local data, as applicable.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

Purpose

A well-written Increased or Improved Services section provides educational partners with a comprehensive description, within a single dedicated section, of how an LEA plans to increase or improve services for its unduplicated students in grades TK–12 as compared to all students in grades TK–12, as applicable, and how LEA-wide or schoolwide actions identified for this purpose meet regulatory requirements. Descriptions provided should include sufficient detail yet be sufficiently succinct to promote a broader understanding of educational partners to facilitate their ability to provide input. An LEA’s description in this section must align with the actions included in the Goals and Actions section as contributing.

Requirements and Instructions

Projected LCFF Supplemental and/or Concentration Grants: Specify the amount of LCFF supplemental and concentration grant funds the LEA estimates it will receive in the coming year based on the number and concentration of low income, foster youth, and English learner students.

Projected Additional LCFF Concentration Grant (15 percent): Specify the amount of additional LCFF concentration grant add-on funding, as described in EC Section 42238.02, that the LEA estimates it will receive in the coming year.

Projected Percentage to Increase or Improve Services for the Coming School Year: Specify the estimated percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year as calculated pursuant to 5 CCR Section 15496(a)(7).

LCFF Carryover — Percentage: Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

LCFF Carryover — Dollar: Specify the LCFF Carryover — Dollar amount identified in the LCFF Carryover Table. If a carryover amount is not identified in the LCFF Carryover Table, specify an amount of zero (\$0).

Total Percentage to Increase or Improve Services for the Coming School Year: Add the Projected Percentage to Increase or Improve Services for the Coming School Year and the Proportional LCFF Required Carryover Percentage and specify the percentage. This is the LEAs percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year, as calculated pursuant to 5 CCR Section 15496(a)(7).

Required Descriptions:

For each action being provided to an entire school, or across the entire school district or COE, an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

For each action included in the Goals and Actions section as contributing to the increased or improved services requirement for unduplicated pupils and provided on an LEA-wide or schoolwide basis, the LEA must include an explanation consistent with 5 CCR Section 15496(b). For any such actions continued into the 2021–24 LCAP from the 2017–2020 LCAP, the LEA must determine whether or not the action was effective as expected, and this determination must reflect evidence of outcome data or actual implementation to date.

Principally Directed and Effective: An LEA demonstrates how an action is principally directed towards and effective in meeting the LEA’s goals for unduplicated students when the LEA explains how:

- It considers the needs, conditions, or circumstances of its unduplicated pupils;
- The action, or aspect(s) of the action (including, for example, its design, content, methods, or location), is based on these considerations; and
- The action is intended to help achieve an expected measurable outcome of the associated goal.

As such, the response provided in this section may rely on a needs assessment of unduplicated students.

Conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient. Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increase or improve services standard because enrolling students is not the same as serving students.

For example, if an LEA determines that low-income students have a significantly lower attendance rate than the attendance rate for all students, it might justify LEA-wide or schoolwide actions to address this area of need in the following way:

After assessing the needs, conditions, and circumstances of our low-income students, we learned that the attendance rate of our low-income students is 7 percent lower than the attendance rate for all students. (Needs, Conditions, Circumstances [Principally Directed])

In order to address this condition of our low-income students, we will develop and implement a new attendance program that is designed to address some of the major causes of absenteeism, including lack of reliable transportation and food, as well as a school climate that does not emphasize the importance of attendance. Goal N, Actions X, Y, and Z provide additional transportation and nutritional resources as well as a districtwide educational campaign on the benefits of high attendance rates. (Contributing Action[s])

These actions are being provided on an LEA-wide basis and we expect/hope that all students with less than a 100 percent attendance rate will benefit. However, because of the significantly lower attendance rate of low-income students, and because the actions meet needs most associated with the chronic stresses and experiences of a socio-economically disadvantaged status, we expect that the attendance rate for our low-income students will increase significantly more than the average attendance rate of all other students. (Measurable Outcomes [Effective In])

COEs and Charter Schools: Describe how actions included as contributing to meeting the increased or improved services requirement on an LEA-wide basis are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above. In the case of COEs and charter schools, schoolwide and LEA-wide are considered to be synonymous.

For School Districts Only:

Actions Provided on an LEA-Wide Basis:

Unduplicated Percentage > 55 percent: For school districts with an unduplicated pupil percentage of 55 percent or more, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above.

Unduplicated Percentage < 55 percent: For school districts with an unduplicated pupil percentage of less than 55 percent, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities. Also describe how the actions **are the most effective use of the funds** to meet these goals for its unduplicated pupils. Provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Actions Provided on a Schoolwide Basis:

School Districts must identify in the description those actions being funded and provided on a schoolwide basis, and include the required description supporting the use of the funds on a schoolwide basis.

For schools with 40 percent or more enrollment of unduplicated pupils: Describe how these actions are principally directed to and effective in meeting its goals for its unduplicated pupils in the state and any local priorities.

For school districts expending funds on a schoolwide basis at a school with less than 40 percent enrollment of unduplicated pupils: Describe how these actions are principally directed to and how the actions are the most effective use of the funds to meet its goals for foster youth, English learners, and low-income students in the state and any local priorities.

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

Consistent with the requirements of 5 CCR Section 15496, describe how services provided for unduplicated pupils are increased or improved by at least the percentage calculated as compared to the services provided for all students in the LCAP year. To improve services means to grow services in quality and to increase services means to grow services in quantity. Services are increased or improved by those actions in the LCAP that are included in the Goals and Actions section as contributing to the increased or improved services requirement, whether they are provided on an LEA-wide or schoolwide basis or provided on a limited basis to unduplicated students. A limited action is an action that only serves foster youth, English learners, and/or low-income students. This description must address how these action(s) are expected to result in the required proportional increase or improvement in services for unduplicated pupils as compared to the services the LEA provides to all students for the relevant LCAP year.

For any action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage. See the instructions for determining the Planned Percentage of Improved Services for information on calculating the Percentage of Improved Services.

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

An LEA that receives the additional concentration grant add-on described in EC Section 42238.02 is required to demonstrate how it is using these funds to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent as compared to the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is equal to or less than 55 percent. The staff who provide direct services to students must be certificated staff and/or classified staff employed by the LEA; classified staff includes custodial staff.

Provide the following descriptions, as applicable to the LEA:

An LEA that does not receive a concentration grant or the concentration grant add-on must indicate that a response to this prompt is not applicable.

Identify the goal and action numbers of the actions in the LCAP that the LEA is implementing to meet the requirement to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent.

An LEA that does not have comparison schools from which to describe how it is using the concentration grant add-on funds, such as an LEA that only has schools with an enrollment of unduplicated students that is greater than 55 percent, must describe how it is using the funds to increase the number of credentialed staff, classified staff, or both, including custodial staff, who provide direct services to students at selected schools and the criteria used to determine which schools require additional staffing support.

In the event that an additional concentration grant add-on is not sufficient to increase staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent, the LEA must describe how it is using the funds to retain staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent.

Complete the table as follows:

- Provide the staff-to-student ratio of classified staff providing direct services to students with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of classified staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of full time equivalent (FTE) staff and the number of enrolled students as counted on the first Wednesday in October of each year.
- Provide the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of FTE staff and the number of enrolled students as counted on the first Wednesday in October of each year.

Action Tables

Complete the Data Entry Table for each action in the LCAP. The information entered into this table will automatically populate the other Action Tables. Information is only entered into the Data Entry Table, the Annual Update Table, the Contributing Actions Annual Update Table, and the LCFF Carryover Table. With the exception of the Data Entry Table, the word “input” has been added to column headers to aid in identifying the column(s) where information will be entered. Information is not entered on the remaining Action tables.

The following tables are required to be included as part of the LCAP adopted by the local governing board or governing body:

- Table 1: Total Planned Expenditures Table (for the coming LCAP Year)

- Table 2: Contributing Actions Table (for the coming LCAP Year)
- Table 3: Annual Update Table (for the current LCAP Year)
- Table 4: Contributing Actions Annual Update Table (for the current LCAP Year)
- Table 5: LCFF Carryover Table (for the current LCAP Year)

Note: The coming LCAP Year is the year that is being planned for, while the current LCAP year is the current year of implementation. For example, when developing the 2022–23 LCAP, 2022–23 will be the coming LCAP Year and 2021–22 will be the current LCAP Year.

Data Entry Table

The Data Entry Table may be included in the LCAP as adopted by the local governing board or governing body, but is not required to be included. In the Data Entry Table, input the following information for each action in the LCAP for that applicable LCAP year:

- **LCAP Year:** Identify the applicable LCAP Year.
- **1. Projected LCFF Base Grant:** Provide the total amount of LCFF funding the LEA estimates it will receive for the coming school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 CCR Section 15496(a)(8).

See *EC* sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF apportionment calculations.

- **2. Projected LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will receive on the basis of the number and concentration of unduplicated students for the coming school year.
- **3. Projected Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected LCFF Base Grant and the Projected LCFF Supplemental and/or Concentration Grants, pursuant to 5 CCR Section 15496(a)(8). This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the coming LCAP year.
- **LCFF Carryover — Percentage:** Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table from the prior LCAP year. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).
- **Total Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected Percentage to Increase or Improve Services for the Coming School Year and the LCFF Carryover —

Percentage. This is the percentage by which the LEA must increase or improve services for unduplicated pupils as compared to the services provided to all students in the coming LCAP year.

- **Goal #:** Enter the LCAP Goal number for the action.
- **Action #:** Enter the action's number as indicated in the LCAP Goal.
- **Action Title:** Provide a title of the action.
- **Student Group(s):** Indicate the student group or groups who will be the primary beneficiary of the action by entering "All," or by entering a specific student group or groups.
- **Contributing to Increased or Improved Services?:** Type "Yes" if the action **is** included as contributing to meeting the increased or improved services; OR, type "No" if the action is **not** included as contributing to meeting the increased or improved services.
- If "Yes" is entered into the Contributing column, then complete the following columns:
 - **Scope:** The scope of an action may be LEA-wide (i.e., districtwide, countywide, or charterwide), schoolwide, or limited. An action that is LEA-wide in scope upgrades the entire educational program of the LEA. An action that is schoolwide in scope upgrades the entire educational program of a single school. An action that is limited in its scope is an action that serves only one or more unduplicated student groups.
 - **Unduplicated Student Group(s):** Regardless of scope, contributing actions serve one or more unduplicated student groups. Indicate one or more unduplicated student groups for whom services are being increased or improved as compared to what all students receive.
 - **Location:** Identify the location where the action will be provided. If the action is provided to all schools within the LEA, the LEA must indicate "All Schools." If the action is provided to specific schools within the LEA or specific grade spans only, the LEA must enter "Specific Schools" or "Specific Grade Spans." Identify the individual school or a subset of schools or grade spans (e.g., all high schools or grades transitional kindergarten through grade five), as appropriate.
- **Time Span:** Enter "ongoing" if the action will be implemented for an indeterminate period of time. Otherwise, indicate the span of time for which the action will be implemented. For example, an LEA might enter "1 Year," or "2 Years," or "6 Months."
- **Total Personnel:** Enter the total amount of personnel expenditures utilized to implement this action.
- **Total Non-Personnel:** This amount will be automatically calculated based on information provided in the Total Personnel column and the Total Funds column.

- **LCFF Funds:** Enter the total amount of LCFF funds utilized to implement this action, if any. LCFF funds include all funds that make up an LEA’s total LCFF target (i.e., base grant, grade span adjustment, supplemental grant, concentration grant, Targeted Instructional Improvement Block Grant, and Home-To-School Transportation).
 - **Note:** For an action to contribute towards meeting the increased or improved services requirement it must include some measure of LCFF funding. The action may also include funding from other sources, however the extent to which an action contributes to meeting the increased or improved services requirement is based on the LCFF funding being used to implement the action.
- **Other State Funds:** Enter the total amount of Other State Funds utilized to implement this action, if any.
- **Local Funds:** Enter the total amount of Local Funds utilized to implement this action, if any.
- **Federal Funds:** Enter the total amount of Federal Funds utilized to implement this action, if any.
- **Total Funds:** This amount is automatically calculated based on amounts entered in the previous four columns.
- **Planned Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis to unduplicated students, and that does not have funding associated with the action, enter the planned quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%). A limited action is an action that only serves foster youth, English learners, and/or low-income students.
 - As noted in the instructions for the Increased or Improved Services section, when identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.

For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Service for the action.

Contributing Actions Table

As noted above, information will not be entered in the Contributing Actions Table; however, the ‘Contributing to Increased or Improved Services?’ column will need to be checked to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses.

Annual Update Table

In the Annual Update Table, provide the following information for each action in the LCAP for the relevant LCAP year:

- **Estimated Actual Expenditures:** Enter the total estimated actual expenditures to implement this action, if any.

Contributing Actions Annual Update Table

In the Contributing Actions Annual Update Table, check the ‘Contributing to Increased or Improved Services?’ column to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses. Provide the following information for each contributing action in the LCAP for the relevant LCAP year:

- **6. Estimated Actual LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.
- **Estimated Actual Expenditures for Contributing Actions:** Enter the total estimated actual expenditure of LCFF funds used to implement this action, if any.
- **Estimated Actual Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis only to unduplicated students, and that does not have funding associated with the action, enter the total estimated actual quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%).
 - Building on the example provided above for calculating the Planned Percentage of Improved Services, the LEA in the example implements the action. As part of the annual update process, the LEA reviews implementation and student outcome data and determines that the action was implemented with fidelity and that outcomes for foster youth students improved. The LEA reviews the original estimated cost for the action and determines that had it hired additional staff to collect and analyze data and to coordinate supports for students that estimated actual cost would have been \$169,500 due to a cost of living adjustment. The LEA would divide the estimated actual cost of \$169,500 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Estimated Actual Percentage of Improved Services for the action.

LCFF Carryover Table

- **9. Estimated Actual LCFF Base Grant:** Provide the total amount of LCFF funding the LEA estimates it will receive for the current school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 CCR Section 15496(a)(8).

- **10. Total Percentage to Increase or Improve Services for the Current School Year:** This percentage will not be entered. The percentage is calculated based on the amounts of the Estimated Actual LCFF Base Grant (9) and the Estimated Actual LCFF Supplemental and/or Concentration Grants (6), pursuant to 5 CCR Section 15496(a)(8), plus the LCFF Carryover – Percentage from the prior year. This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the current LCAP year.

Calculations in the Action Tables

To reduce the duplication of effort of LEAs, the Action Tables include functionality such as pre-population of fields and cells based on the information provided in the Data Entry Table, the Annual Update Summary Table, and the Contributing Actions Table. For transparency, the functionality and calculations used are provided below.

Contributing Actions Table

- 4. Total Planned Contributing Expenditures (LCFF Funds)
 - This amount is the total of the Planned Expenditures for Contributing Actions (LCFF Funds) column
- 5. Total Planned Percentage of Improved Services
 - This percentage is the total of the Planned Percentage of Improved Services column
- Planned Percentage to Increase or Improve Services for the coming school year (4 divided by 1, plus 5)
 - This percentage is calculated by dividing the Total Planned Contributing Expenditures (4) by the Projected LCFF Base Grant (1), converting the quotient to a percentage, and adding it to the Total Planned Percentage of Improved Services (5).

Contributing Actions Annual Update Table

Pursuant to *EC* Section 42238.07(c)(2), if the Total Planned Contributing Expenditures (4) is less than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the LEA is required to calculate the difference between the Total Planned Percentage of Improved Services (5) and the Total Estimated Actual Percentage of Improved Services (7). If the Total Planned Contributing Expenditures (4) is equal to or greater than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the Difference Between Planned and Estimated Actual Percentage of Improved Services will display “Not Required.”

- 6. Estimated Actual LCFF Supplemental and Concentration Grants
 - This is the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.
- 4. Total Planned Contributing Expenditures (LCFF Funds)
 - This amount is the total of the Last Year's Planned Expenditures for Contributing Actions (LCFF Funds)

- 7. Total Estimated Actual Expenditures for Contributing Actions
 - This amount is the total of the Estimated Actual Expenditures for Contributing Actions (LCFF Funds)
- Difference Between Planned and Estimated Actual Expenditures for Contributing Actions (Subtract 7 from 4)
 - This amount is the Total Estimated Actual Expenditures for Contributing Actions (7) subtracted from the Total Planned Contributing Expenditures (4)
- 5. Total Planned Percentage of Improved Services (%)
 - This amount is the total of the Planned Percentage of Improved Services column
- 8. Total Estimated Actual Percentage of Improved Services (%)
 - This amount is the total of the Estimated Actual Percentage of Improved Services column
- Difference Between Planned and Estimated Actual Percentage of Improved Services (Subtract 5 from 8)
 - This amount is the Total Planned Percentage of Improved Services (5) subtracted from the Total Estimated Actual Percentage of Improved Services (8)

LCFF Carryover Table

- 10. Total Percentage to Increase or Improve Services for the Current School Year (6 divided by 9 + Carryover %)
 - This percentage is the Estimated Actual LCFF Supplemental and/or Concentration Grants (6) divided by the Estimated Actual LCFF Base Grant (9) plus the LCFF Carryover – Percentage from the prior year.
- 11. Estimated Actual Percentage of Increased or Improved Services (7 divided by 9, plus 8)
 - This percentage is the Total Estimated Actual Expenditures for Contributing Actions (7) divided by the LCFF Funding (9), then converting the quotient to a percentage and adding the Total Estimated Actual Percentage of Improved Services (8).
- 12. LCFF Carryover — Dollar Amount LCFF Carryover (Subtract 11 from 10 and multiply by 9)
 - If the Estimated Actual Percentage of Increased or Improved Services (11) is less than the Estimated Actual Percentage to Increase or Improve Services (10), the LEA is required to carry over LCFF funds.

The amount of LCFF funds is calculated by subtracting the Estimated Actual Percentage to Increase or Improve Services (11) from the Estimated Actual Percentage of Increased or Improved Services (10) and then multiplying by the Estimated Actual LCFF Base Grant (9). This amount is the amount of LCFF funds that is required to be carried over to the coming year.

- 13. LCFF Carryover — Percentage (12 divided by 9)
 - This percentage is the unmet portion of the Percentage to Increase or Improve Services that the LEA must carry over into the coming LCAP year. The percentage is calculated by dividing the LCFF Carryover (12) by the LCFF Funding (9).

California Department of Education
